

TABLE OF CONTENTS

Introduction	1
CHAPTER I - THE SINGLE FIRST ORDER EQUATION	
1. The linear and quasi-linear equations.	6
2. The general first order equation for a function of two variables.	15
3. The general first order equation for a function of n independent variables.	37
CHAPTER II - THE CAUCHY PROBLEM FOR HIGHER ORDER EQUATIONS	
1. Analytic functions of several real variables	48
2. Formulation of the Cauchy problem. The notion of characteristics.	54
3. The Cauchy problem for the general non-linear equation.	71
4. The Cauchy-Kowalewsky theorem.	76
CHAPTER III - SECOND ORDER EQUATIONS WITH CONSTANT COEFFICIENTS	
1. Equations in two independent variables, Canonical forms	87
2. The one-dimensional wave equation.	92
3. The wave equation in higher dimensions. Method of spherical means. Method of descent.	101
4. The inhomogeneous wave equation by Duhamel's principle	110
5. The potential equation in two dimensions	116
6. The Dirichlet problem.	127
7. The Green's function and the fundamental solution.	145
8. Equations related to the potential equation.	151
9. Continuation of harmonic functions	167
10. The heat equation.	170
CHAPTER IV - THE CAUCHY PROBLEM FOR LINEAR HYPERBOLIC EQUATIONS IN GENERAL	
1. Riemann's method of integration.	186

2. Higher order equations in two independent variables. . . .	196
3. The method of plane waves.	204
LIST OF BOOKS RECOMMENDED FOR FURTHER STUDY	215
INDEX.	217
