

Compact Manifolds with Special Holonomy

Dominic D. Joyce
Lincoln College, Oxford

OXFORD
UNIVERSITY PRESS

CONTENTS

1	Background material	1
1.1	Exterior forms on manifolds	1
1.2	Introduction to analysis	4
1.3	Introduction to elliptic operators	7
1.4	Regularity of solutions of elliptic equations	13
1.5	Existence of solutions of linear elliptic equations	16
2	Introduction to connections, curvature and holonomy groups	20
2.1	Bundles, connections and curvature	20
2.2	Vector bundles, connections and holonomy groups	25
2.3	Holonomy groups and principal bundles	29
2.4	Holonomy groups and curvature	32
2.5	Connections on the tangent bundle, and torsion	33
2.6	G -structures and intrinsic torsion	38
3	Riemannian holonomy groups	42
3.1	Introduction to Riemannian holonomy groups	42
3.2	Reducible Riemannian manifolds	46
3.3	Riemannian symmetric spaces	50
3.4	The classification of Riemannian holonomy groups	55
3.5	Holonomy groups and de Rham cohomology	59
3.6	Spinors and holonomy groups	64
3.7	Calibrated geometry and holonomy groups	68
4	Kähler manifolds	71
4.1	Introduction to complex manifolds	72
4.2	Tensors on complex manifolds	75
4.3	Holomorphic vector bundles	77
4.4	Introduction to Kähler manifolds	78
4.5	Kähler potentials	80
4.6	Curvature of Kähler manifolds	81
4.7	Exterior forms on Kähler manifolds	82
4.8	Complex algebraic varieties	86
4.9	Singular varieties, resolutions, and deformations	90
4.10	Line bundles and divisors	94

5	The Calabi conjecture	98
5.1	Reformulating the Calabi conjecture	99
5.2	Overview of the proof of the Calabi conjecture	101
5.3	Calculations at a point	105
5.4	The proof of Theorem C1	108
5.5	The proof of Theorem C2	115
5.6	The proof of Theorem C3	117
5.7	The proof of Theorem C4	119
5.8	A discussion of the proof	119
6	Calabi–Yau manifolds	121
6.1	The holonomy groups $SU(m)$	122
6.2	Compact Ricci-flat Kähler manifolds	123
6.3	Crepant resolutions, small resolutions, and flops	126
6.4	Crepant resolutions of quotient singularities	128
6.5	Complex orbifolds	132
6.6	Crepant resolutions of orbifolds	136
6.7	Complete intersections	139
6.8	Deformations of Calabi–Yau manifolds	142
6.9	String Theory and Mirror Symmetry	144
6.10	Further reading on Calabi–Yau manifolds	146
7	Hyperkähler manifolds	148
7.1	An introduction to hyperkähler geometry	149
7.2	Hyperkähler ALE spaces	153
7.3	$K3$ surfaces	155
7.4	Higher-dimensional compact hyperkähler manifolds	162
7.5	The other quaternionic geometries	167
7.6	A reading list on quaternionic geometry	169
8	Asymptotically locally Euclidean metrics with holonomy $SU(m)$	172
8.1	Introduction to ALE metrics	173
8.2	Ricci-flat ALE Kähler manifolds	175
8.3	Analysis on ALE manifolds	178
8.4	Exterior forms and de Rham cohomology	182
8.5	The Calabi conjecture for ALE manifolds	186
8.6	A priori estimates of ϕ	188
8.7	The proofs of Theorems A1–A4	196
8.8	The proofs of Theorems 8.2.3 and 8.2.4	199
8.9	The case $m = 2$, and deformations	201

9	QALE metrics with holonomy $SU(m)$ and $Sp(m)$	203
9.1	Local product resolutions	204
9.2	Quasi-ALE Kähler metrics	208
9.3	Ricci-flat QALE Kähler manifolds	210
9.4	Kähler potentials on QALE Kähler manifolds	215
9.5	Analysis on QALE Kähler manifolds	219
9.6	The Calabi conjecture for QALE manifolds	225
9.7	A more complicated QALE Calabi conjecture	228
9.8	The proofs of Theorems 9.3.3 and 9.3.4	232
9.9	Generalized QALE manifolds	235
10	Introduction to the exceptional holonomy groups	242
10.1	The holonomy group G_2	242
10.2	The topology of compact G_2 -manifolds	245
10.3	Exterior forms on G_2 -manifolds	247
10.4	The moduli space of holonomy G_2 metrics	251
10.5	The holonomy group $Spin(7)$	254
10.6	The topology of compact $Spin(7)$ -manifolds	259
10.7	The moduli space of holonomy $Spin(7)$ metrics	261
10.8	Exceptional holonomy and calibrated geometry	264
10.9	A reading list on the exceptional holonomy groups	268
11	Construction of compact G_2-manifolds	270
11.1	Resolving G_2 -singularities with holonomy $SU(2)$, $SU(3)$	271
11.2	Quasi-ALE G_2 -manifolds	274
11.3	Some notation to describe the orbifolds T^7/Γ	278
11.4	R-data and resolutions of T^7/Γ	280
11.5	G_2 -structures on M with small torsion	284
11.6	An existence result for compact G_2 -manifolds	294
11.7	The proof of Theorem G1	297
11.8	The proof of Theorem G2	299
11.9	Other constructions of compact G_2 -manifolds	303
12	Examples of compact 7-manifolds with holonomy G_2	306
12.1	Topological invariants of resolutions of T^7/Γ	306
12.2	A simple example	309
12.3	A modification of the example of §12.2	312
12.4	Examples with nontrivial fundamental group	314
12.5	A more complicated example	315
12.6	Examples of associative and coassociative submanifolds	326
12.7	An example of a resolution of T^7/Γ with Γ nonabelian	329
12.8	More examples	334
12.9	Conclusions	338

13 Construction of compact Spin(7)-manifolds	341
13.1 Resolving Spin(7)-singularities and QALE Spin(7)-manifolds	342
13.2 Orbifolds T^8/Γ , R-data, and resolutions of T^8/Γ	346
13.3 Construction of various exterior forms	349
13.4 Introducing a real parameter $t \in (0, 1]$	352
13.5 Spin(7)-structures on M with small torsion	355
13.6 An existence result for compact Spin(7)-manifolds	360
13.7 The proof of Theorem S2	362
14 Examples of compact 8-manifolds with holonomy Spin(7)	366
14.1 Topological invariants of resolutions of T^8/Γ	366
14.2 A simple example	368
14.3 Examples of Cayley submanifolds	371
14.4 A more complicated example	373
14.5 Another example with $\Gamma = \mathbb{Z}_2^4$	380
14.6 An example with Γ nonabelian	386
15 A second construction of compact 8-manifolds with holonomy Spin(7)	392
15.1 ALE Spin(7)-manifolds	393
15.2 Proof of the construction	395
15.3 How to apply the construction	401
15.4 A simple example	406
15.5 Examples from hypersurfaces in $\mathbb{C}\mathbb{P}_{a_0, \dots, a_5}^5$	408
15.6 A hypersurface of degree 8 in $\mathbb{C}\mathbb{P}_{1,1,1,1,2,2}^5$ over \mathbb{Z}_2	411
15.7 Examples from complete intersections in $\mathbb{C}\mathbb{P}_{a_0, \dots, a_6}^6$	413
15.8 Discussion, and questions for future research	416
References	419
