## Contributors ix

### 1. Introduction. Life cycle thinking

Anna Mazzi

- 1.1 From the environmental concerns to a life cycle perspective 1
- 1.2 History of LCT 4
- 1.3 LCT and sustainability 7
- 1.4 Tools and actions in LCT 9
- 1.5 Emerging trends in LCT 15
- References 16

### 2. Sustainability, sustainable development, and business sustainability

Marta Avesani

- 2.1 Sustainability and sustainable development: Main concepts and approaches 21
- 2.2 Sustainability in the global public agenda 25
- 2.3 Business sustainability 26
- References 36
- Further reading 38

### 3. Life cycle thinking tools: Life cycle assessment, life cycle costing and social life cycle assessment

Sara Toniolo, Roberta Chiara Tosato, Fabio Gambaro, and Jingzheng Ren

- 3.1 Life cycle assessment methodology 39
- 3.2 Life cycle costing methodology 46
- 3.3 Social life cycle assessment methodology 50
- References 53

### 4. Life cycle sustainability assessment: An ongoing journey

Sara Zanni, Eric Awere, and Alessandra Bonoli

- 4.1 Introduction 57
- 4.2 Early years: From concept to scheme 61
- 4.3 Pathway to standardization: The role of LCI/SETAC/UNEP in framework definition 63
- 4.4 LCSA development in two decades of practice: A case study anthology 73
- 4.5 Outlook: Perspective and opportunities 84
- References 89
- Further reading 93

### 5. Development and applicability of life cycle impact assessment methodologies

Sheng Yang, Kebo Ma, Zhiqiang Liu, Jingzheng Ren, and Yi Man

- 5.1 Introduction 95
- 5.2 The environmental assessment—LCA 98
- 5.3 The economic assessment—LCC 104
- 5.4 The social assessment—S-LCA 108
- 5.5 The sustainability assessment—LCSA 116
- 5.6 Conclusion 119
- References 120

### 6. Life cycle thinking for sustainable development in the building industry

Jinming Lei, Beijia Huang, and Ying Huang

- 6.1 Introduction 125
- 6.2 Life cycle of building materials 126
- 6.3 Green building materials 126
- 6.4 Recycling of construction and demolition waste 132
- References 136

7. MCDM for sustainability ranking of district heating systems considering uncertainties  
Haichao Wang and Risto Lahdelma
- 7.1 Introduction 139  
7.2 Methods 141  
7.3 Results and discussion 146  
7.4 Conclusions 151  
Acknowledgments 151  
References 151
8. Framework of life cycle sustainability assessment  
Ruojue Lin, Yi Man, and Jingzheng Ren
- 6.1 Introduction 155  
6.2 Framework of LCSA 156  
6.3 Recent studies of LCSA 164  
6.4 Conclusions 170  
References 171
9. Life cycle decision support framework: Method and case study  
Ruojue Lin, Yi Man, and Jingzheng Ren
- 9.1 Introduction 175  
9.2 Literature reviews 176  
9.3 Methodology 182  
9.4 Case study 186  
9.5 Conclusions 198  
References 198
10. Advancing life cycle sustainability assessment using multiple criteria decision making  
Pradip P. Kalbar and Deepjyoti Das
- 10.1 Introduction 205  
10.2 MCDM methods overview 206  
10.3 Generic structure of MADM methods 208  
10.4 Application of MADM in LCSA 210  
10.5 Challenges in the application of MADM for LCSA 212
- 10.6 Proposed framework for MADM based LCSA 218  
10.7 Conclusions 220  
References 221
11. A composite life cycle sustainability index for sustainability prioritization of industrial systems  
Di Xu, Weichen Li, and Lichun Dong
- 11.1 Introduction 225  
11.2 Life cycle environmental indicators 226  
11.3 Life cycle economic indicators 233  
11.4 Life cycle social indicators 237  
11.5 A composite life cycle sustainability index 241  
11.6 Conclusions 249  
Acknowledgments 250  
References 250
12. Life cycle sustainability assessment and decision-making under uncertainties  
Ana Carolina Maia Angelo and Lino Guimarães Marujo
- 12.1 Introduction 253  
12.2 The decision-making under uncertainties 254  
12.3 LCSA and decision-making under uncertainties 256  
12.4 Final remarks 265  
References 265  
Further reading 268
13. Multi-criteria decision-making after life cycle sustainability assessment under hybrid information  
Jingzheng Ren and Sara Toniolo
- 13.1 Introduction 269  
13.2 Decision-making under multi-type data condition 271  
13.3 Case study 280  
13.4 Sensitivity analysis 287  
13.5 Conclusions 288  
Acknowledgment 288  
References 288

14. Life cycle sustainability decision-making framework for the prioritization of electrochemical energy storage under uncertainties  
Sen Guo
- 14.1 Introduction 291
- 14.2 Criteria system for life cycle sustainability decision-making of the prioritization of electrochemical energy storage 293
- 14.3 Methods 295
- 14.4 Empirical analysis 302
- 14.5 Conclusions 306
- Acknowledgments 307
- References 307
15. Barriers identification and prioritization for sustainability enhancement: Promoting the sustainable development of the desalination industry  
Jingzheng Ren
- 15.1 Introduction 309
- 15.2 Barriers to sustainable desalination industry in China 310
- 15.3 Methods 312
- 15.4 Results and discussion 318
- 15.5 Policy implications 323
- 15.6 Conclusions 324
- Appendix: The relative influences of the influential factors on each factor 325
- References 326
16. Integrated data envelopment analysis, weighting method and life cycle thinking: A quantitative framework for life cycle sustainability improvement  
Jingzheng Ren
- 16.1 Introduction 329
- 16.2 Methods 330
- 16.3 Case study 338
- 16.4 Results and discussion 339
- 16.5 Conclusion 342
- Acknowledgment 343
- References 343
- Index 345**
