

## Contents

Preface	vii
Lecture on Calderón problem YAVAR KIAN	1
Multidimensional Borg-Levinson inverse spectral problems ÉRIC SOCCORSI	19
Simultaneous and indirect control of waves: Some recent developments and open problems LOUIS TEBOU	51
Observability and stabilization of the wave equation with moving boundary or pointwise feedback KAÏS AMMARI, AHMED BCHATNIA, and KARIM EL MUFTI	91
Sharp estimates of the one-dimensional boundary control cost for parabolic systems MANUEL GONZÁLEZ-BURGOS and LYDIA OUAILI	109
Theoretical and numerical aspects related to the energy of some Timoshenko systems MAKRAM HAMOUDA	127
On the finite-time stabilization of some hyperbolic control systems by boundary feedback laws: Lyapunov approach CHAKER JAMMAZI and GHADA BEN BELGACEM	137
A stochastic sub-grid viscosity model and wavelet based method for images assimilation SOULEYMANE KADRI HAROUNA and ETIENNE MÉMIN	161
