

Contents

1. Introduction	1
Part 1. Structure, notation and preliminaries	11
2. Boundary degenerations, exponents, Schwartz and Harish-Chandra Schwartz spaces	12
3. Bundles over tori	21
4. Coinvariants and the bundles of X -discrete and X -cuspidal representations	24
Part 2. Discrete and cuspidal summands	31
5. Discrete summand of the Harish-Chandra Schwartz space	32
6. Cuspidal part of the Schwartz space	35
Part 3. Eisenstein integrals	39
7. Smooth and unitary asymptotics	40
8. Definition and regularity of Eisenstein integrals	43
Part 4. Scattering	47
9. Goals	48
10. Eigenspace decomposition of Eisenstein integrals	50
11. Scattering: the unitary case	63
12. Scattering: the smooth case	67
Part 5. Paley–Wiener theorems	73
13. The Harish-Chandra Schwartz space	74
14. The Schwartz space	81
15. Examples of scattering operators	84
16. The Bernstein center and the group Paley–Wiener theorem	90
Appendix A. Characterization of strongly factorizable spherical varieties	95
Bibliography	101
