

# Contents

<b>Symbol Definition List</b> .....	xv
<b>1 What Is a Stochastic Process?</b> .....	1
Exercises .....	15
<b>2 The Simple Random Walk I: Associated Boundary Value Distributions, Transience, and Recurrence</b> .....	17
Exercises .....	22
<b>3 The Simple Random Walk II: First Passage Times</b> .....	27
Exercises .....	37
<b>4 Multidimensional Random Walk</b> .....	41
Exercises .....	44
<b>5 The Poisson Process, Compound Poisson Process, and Poisson Random Field</b> .....	47
Exercises .....	56
<b>6 The Kolmogorov–Chentsov Theorem and Sample Path Regularity</b> ..	61
Exercises .....	68
<b>7 Random Walk, Brownian Motion, and the Strong Markov Property</b>	71
Exercises .....	93
<b>8 Coupling Methods for Markov Chains and the Renewal Theorem for Lattice Distributions</b> .....	99
Exercises .....	109
<b>9 Bienaymé–Galton–Watson Simple Branching Process and Extinction</b> .....	113
Exercises .....	121
<b>10 Martingales: Definitions and Examples</b> .....	123
Exercises .....	132

<b>11</b>	<b>Optional Stopping of (Sub)Martingales</b> .....	135
	Exercises .....	147
<b>12</b>	<b>The Upcrossings Inequality and (Sub)Martingale Convergence</b> .....	151
	Exercises .....	161
<b>13</b>	<b>Continuous Parameter Martingales</b> .....	163
	Exercises .....	171
<b>14</b>	<b>Growth of Supercritical Bienaymé–Galton–Watson Simple Branching Processes</b> .....	173
	Exercises .....	183
<b>15</b>	<b>Stochastic Calculus for Point Processes and a Martingale Characterization of the Poisson Process</b> .....	185
	Exercises .....	190
<b>16</b>	<b>First Passage Time Distributions for Brownian Motion with Drift and a Local Limit Theorem</b> .....	191
	Exercises .....	197
<b>17</b>	<b>The Functional Central Limit Theorem (FCLT)</b> .....	199
	Exercises .....	211
<b>18</b>	<b>ArcSine Law Asymptotics</b> .....	215
	Exercises .....	224
<b>19</b>	<b>Brownian Motion on the Half-Line: Absorption and Reflection</b> .....	227
	Exercises .....	232
<b>20</b>	<b>The Brownian Bridge</b> .....	235
	Exercises .....	240
<b>21</b>	<b>Special Topic: Branching Random Walk, Polymers, and Multiplicative Cascades</b> .....	243
	Exercises .....	260
<b>22</b>	<b>Special Topic: Bienaymé–Galton–Watson Simple Branching Process and Excursions</b> .....	263
	Exercises .....	274
<b>23</b>	<b>Special Topic: The Geometric Random Walk and the Binomial Tree Model of Mathematical Finance</b> .....	279
	Exercises .....	288
<b>24</b>	<b>Special Topic: Optimal Stopping Rules</b> .....	291
	Exercises .....	301
<b>25</b>	<b>Special Topic: A Comprehensive Renewal Theory for General Random Walks</b> .....	305
	Exercises .....	328

<b>26</b>	<b>Special Topic: Ruin Problems in Insurance</b> .....	329
	Exercises .....	346
<b>27</b>	<b>Special Topic: Fractional Brownian Motion and/or Trends: The Hurst Effect</b> .....	347
	Exercises .....	361
<b>28</b>	<b>Special Topic: Incompressible Navier–Stokes Equations and the Le Jan–Sznitman Cascade</b> .....	363
	Exercises .....	376
	<b>References</b> .....	379
	<b>Author Index</b> .....	387
	<b>Subject Index</b> .....	391
