

Contents

Foreword to the Sixth Edition	vii
<i>Rodney Hanneman</i>	
Technical Editor's Introduction	ix
<i>J. Gilbert Kaufman</i>	
Author's Preface	xi
<i>Dietrich G. Altenpohl</i>	
Acknowledgements and Contributors	xiii
Chapters	
1: Introduction	1
2: Production and Processing of Aluminum	7
3: The Internal Structure of Aluminum	27
4: Formation of the Cast Structure	33
5: Melt Quality and Treatment	61
6: Industrial Casting Processes	77
7: Properties of Aluminum under Mechanical Stress and during Deformation	127
8: Fundamentals of Cold Working and Forming	149
9: Industrial Forming Processes	163
10: Removal of Work Hardening through Heat Treatment	199
11: Alloy Hardening	211
12: Corrosion Resistance and Protection	229
13: Aluminum's Edifice of Knowledge, Its Main Impacts	259
14: Aluminum in the Materials Competition	291
15: Important Aluminum Applications	319
16: Aluminum and Its Environment	395
17: Aluminum in Change	415
Color Plates	
Figure 2.5	425
Figure 6.35	426
Appendices	
A. Explanation of Important Terms	427
B. Alloy and Temper Designation Systems for Aluminum	446
C. Synopsis of Modifications to the Structure and Atomic Arrangement for the Principle Fabrication Stages of Rolled Semis	454
D. Chemical Compositions and Properties	459
E. Subject Index	462
F. List of Key Reference Resources	469
About the Author	471
About the Aluminum Association and The Minerals, Metals & Materials Society .	473
