

Contents

1	Notation and Background	1
1.1	Basic Terminology and Notation	1
1.2	Algebra and Linear Algebra	2
1.3	Real Analysis and Differential Calculus	4
1.4	Differential Geometry	5
1.5	Riemannian Geometry and Connections.....	8
1.6	Jet Bundles	11
1.7	Topology.....	12
1.7.1	Basics.....	12
1.7.2	Metric and Uniform Spaces	13
1.7.3	Initial and Final Topologies, Inverse and Direct Limits.....	14
1.8	Locally Convex Topological Vector Spaces	17
1.8.1	Inverse and Direct Limits of Locally Convex Topological Vector Spaces	18
1.8.2	Metrisable Locally Convex Topological Vector Spaces.....	21
1.8.3	Open Mapping Theorems for Locally Convex Topological Vector Spaces	22
1.8.4	Nuclear Locally Convex Topological Spaces.....	24
1.8.5	Tensor Products of Locally Convex Topological Vector Spaces	24
1.9	Real Analytic Real Analysis.....	26
2	Topology for Spaces of Real Analytic Sections and Mappings	31
2.1	Real Analytic Differential Geometry.....	31
2.1.1	The Fundamental Objects of Real Analytic Differential Geometry	32
2.1.2	Existential Constructions in Real Analytic Differential Geometry	32
2.1.3	Complexification of Real Analytic Manifolds and Vector Bundles	39

2.2	Martineau's Descriptions of the Real Analytic Topology	40
2.2.1	Germs of Holomorphic Sections Over Subsets of a Real Analytic Manifold.....	41
2.2.2	A Natural Direct Limit Topology for the Space of Real Analytic Sections	42
2.2.3	The Topology of Holomorphic Germs About a Compact Set.....	43
2.2.4	An Inverse Limit Topology for the Space of Real Analytic Sections	47
2.2.5	Properties of the C^ω -Topology	49
2.3	Constructions with Jet Bundles.....	52
2.3.1	Decompositions for Jet Bundles	53
2.3.2	Fibre Norms for Jet Bundles of Vector Bundles.....	60
2.4	Seminorms for the C^ω -Topology	62
2.4.1	A Weighted Direct Limit Topology for Sections of Bundles of Infinite Jets	62
2.4.2	Definition of Seminorms	67
2.5	The Topology for the Space of Real Analytic Mappings	73
2.5.1	Motivation for, and Definition of, the Weak-PB Topology ...	74
2.5.2	The Topology for the Space of Holomorphic Mappings.....	79
2.5.3	Germs of Holomorphic Mappings Over Subsets of a Real Analytic Manifold.....	82
2.5.4	Direct and Inverse Limit Topologies for the Space of Real Analytic Mappings.....	87
3	Geometry: Lifts and Differentiation of Tensors	93
3.1	Tensors on the Total Space of a Vector Bundle	94
3.1.1	Functions on Vector Bundles.....	94
3.1.2	Vector Fields on Vector Bundles	95
3.1.3	Linear Mappings on Vector Bundles.....	97
3.1.4	Tensors Fields on Vector Bundles.....	99
3.1.5	Tensor Contractions	101
3.2	Differentiation of Tensors on the Total Space of a Vector Bundle....	105
3.2.1	Vector Bundles as Riemannian Submersions.....	105
3.2.2	Derivatives of Tensor Contractions	112
3.2.3	Derivatives of Tensors on the Total Space of a Vector Bundle	116
3.2.4	Prolongation.....	126
3.3	Isomorphisms Defined by Lifts and Pull-Backs	137
3.3.1	Isomorphisms for Horizontal Lifts of Functions	137
3.3.2	Isomorphisms for Vertical Lifts of Sections	145
3.3.3	Isomorphisms for Horizontal Lifts of Vector Fields	152
3.3.4	Isomorphisms for Vertical Lifts of Dual Sections.....	156
3.3.5	Isomorphisms for Vertical Lifts of Endomorphisms	160
3.3.6	Isomorphisms for Vertical Evaluations of Dual Sections	164

3.3.7	Isomorphisms for Vertical Evaluations of Endomorphisms.....	170
3.3.8	Isomorphisms for Pull-Backs of Functions.....	181
3.3.9	Comparison of Iterated Covariant Derivatives for Different Connections	192
4	Analysis: Norm Estimates for Derivatives	201
4.1	Fibre Norms for Some Useful Jet Bundles.....	201
4.1.1	Fibre Norms for Horizontal Lifts of Functions.....	202
4.1.2	Fibre Norms for Vertical Lifts of Sections.....	203
4.1.3	Fibre Norms for Horizontal Lifts of Vector Fields	204
4.1.4	Fibre Norms for Vertical Lifts of Dual Sections	206
4.1.5	Fibre Norms for Vertical Lifts of Endomorphisms.....	207
4.1.6	Fibre Norms for Vertical Evaluations of Dual Sections.....	208
4.1.7	Fibre Norms for Vertical Evaluations of Endomorphisms	209
4.1.8	Fibre Norms for Pull-Backs of Functions	210
4.2	Estimates Related to Jet Bundle Norms.....	214
4.2.1	Algebraic Estimates	215
4.2.2	Tensor Field Estimates	223
4.3	Independence of Topologies on Connections and Metrics	238
4.3.1	Comparison of Metric-Related Notions for Different Connections and Metrics	238
4.3.2	Local Descriptions of the Real Analytic Topology	246
5	Continuity of Some Standard Geometric Operations.....	253
5.1	Continuity of Algebraic Operations and Constructions	254
5.1.1	Continuity of Linear Algebraic Operations.....	254
5.1.2	Direct Sums and Tensor Products of Spaces of Sections	258
5.2	Continuity of Operations Involving Differentiation	270
5.3	Continuity of Lifting Operations	275
5.4	Continuity of Composition Operators.....	287
5.4.1	The Real Analytic Composition Operator	288
5.4.2	The Real Analytic Superposition Operator	292
	List of Symbols	299
	References	305
	Index.....	309
