Chapter 1. Introduction	1
Acknowledgments	11
Chapter 2. Preliminaries part I:	
Category theoretical background	13
2.1. Diagrams and (co)fibered categories	13
2.2. Fibered topoi and derived categories	20
2.3. Usual sites for log schemes	28
2.4. Crystalline sites for log schemes	29
2.5. Small crystalline sites, functoriality	33
2.6. Crystals on crystalline sites	39
Chapter 3. Preliminaries part II:	
Some properties for sheaves	45
3.1. 1-motives and p -divisible groups	45
3.2. Technical remarks on certain <i>top</i> sheaves	49
3.3. Projective systems and p -divisibility over a \mathbb{Z}/p -algebra	52
3.4. Limits and quasi-coherence on p -adic formal schemes	55
3.5. Limits and quasi-coherence on crystalline sites	61
Chapter 4. Preliminaries part III:	
Crystals and local finite p -bases	65
4.1. Local p -bases and local embeddings	65
4.2. Modules with logarithmic connection	70
4.3. Crystalline and de Rham cohomology of crystals (linearization functors)	76
4.4. Exactness for crystals	83
4.5. Twists by effective logarithmic divisors	86
Chapter 5. Twisted syntomic complexes for Dieudonné crystals	91
5.1. The category of $(1, \varphi)$ -modules	91
5.2. Local embeddings with Frobenius and cohomological descent	93
5.3. The relative Frobenius and Cartier's descent for crystals	100
5.4. The mod p Hodge filtration on the small crystalline étale site	110
5.5. Twisted syntomic complexes on the étale site	119
5.6. Syntomic complexes on the syntomic site	125
Chapter 6. Dévissage of flat cohomology	135
6.1. Functorial mapping fibers in derived categories	135
6.2. Some useful diagrams and functors	136
6.3. Vanishing cohomology	142

6.4. Complete Mayer–Vietoris for semi-Abelian schemes over C	147
6.5. Rigid uniformization around semi-stable fibers	150
6.6. Dévissage in p -divisible groups	155
Chapter 7. Dévissage of twisted syntomic complexes	157
7.1. Complete Mayer–Vietoris	157
7.2. A localization triangle	161
Chapter 8. Dieudonné crystals for semi-stable Abelian varieties	165
8.1. Dévissage of log 1-motives	165
8.2. The semi-stable Dieudonné functor	170
Chapter 9. The comparison theorem	185
9.1. Diagrams of p -divisible groups	185
9.2. Semi-Abelian schemes over C	201
Chapter 10. Index of notations	203
Chapter 11. Index of terminology	211
Bibliography	213
