

Contents

1	Riemann Surfaces, Braids, Mapping Classes, and Teichmüller Theory	1
1.1	Free Homotopy Classes of Mappings and Conjugacy Classes of Group Elements	1
1.2	Riemann Surfaces	2
1.3	Braids	12
1.4	Mapping Class Groups	16
1.5	The Relation Between Braids and Mapping Classes	19
1.6	Beltrami Differentials and Quadratic Differentials	23
1.7	Elements of Teichmüller Theory	28
1.8	Thurston's Classification of Mapping Classes	41
2	The Entropy of Surface Homeomorphisms	55
2.1	The Topological Entropy of Mapping Classes	55
2.2	Absolutely Extremal Homeomorphisms and the Trajectories of the Associated Quadratic Differentials	66
2.3	The Entropy of Pseudo-Anosov Self-homeomorphisms of Surfaces with Distinguished Points	71
2.4	Pseudo-Anosov Self-homeomorphisms of Closed Surfaces Are Entropy Minimizing	80
2.5	The Entropy of Mapping Classes on Second Kind Riemann Surfaces	95
3	Conformal Invariants of Homotopy Classes of Curves. The Main Theorem	109
3.1	Ahlfors' Extremal Length and Conformal Module	109
3.2	Another Notion of Extremal Length	113
3.3	Invariants of Conjugacy Classes of Braids: Statement of the Main Theorem	127
3.4	Main Theorem. The Upper Bound for the Conformal Module. The Irreducible Case	129

3.5	The Lower Bound for the Conformal Module. The Irreducible Case	135
4	Reducible Pure Braids. Irreducible Nodal Components, Irreducible Braid Components, and the Proof of the Main Theorem	143
4.1	Irreducible Nodal Components. Pure Braids	143
4.2	The Irreducible Braid Components. Pure Braids	146
4.3	The Relation Between Irreducible Nodal Components and Irreducible Braid Components	150
4.4	Recovery of the Conjugacy Class of a Pure Braid from the Irreducible Braid Components	152
4.5	Pure Braids, the Reducible Case. Proof of the Main Theorem	156
5	The General Case. Irreducible Nodal Components, Irreducible Braid Components, and the Proof of the Main Theorem	161
5.1	Irreducible Nodal Components. The General Case	161
5.2	Irreducible Braid Components. The General Case	165
5.3	The Building Block of the Recovery. The General Case	171
5.4	Recovery of Conjugacy Classes of Braids from the Irreducible Braid Components. The General Case	174
5.5	Proof of the Main Theorem for Reducible Braids. The General Case	179
6	The Conformal Module and Holomorphic Families of Polynomials	195
6.1	Historical Remarks	195
6.2	Families of Polynomials, Solvability and Reducibility	198
7	Gromov's Oka Principle and Conformal Module	205
7.1	Gromov's Oka Principle and the Conformal Module of Conjugacy Classes of Elements of the Fundamental Group	205
7.2	Description of Gromov-Oka Mappings from Open Riemann Surfaces to $\mathbb{C} \setminus \{-1, 1\}$	216
7.3	Gromov-Oka Mappings from Tori with a Hole to \mathfrak{P}_3	226
8	Gromov's Oka Principle for $(\mathfrak{g}, \mathfrak{m})$-Fiber Bundles	235
8.1	$(\mathfrak{g}, \mathfrak{m})$ -Fiber Bundles. Statement of the Problem	235
8.2	The Monodromy of $(\mathfrak{g}, \mathfrak{m})$ -Bundles. Isotopy and Isomorphism of Bundles	238
8.3	$(0, 4)$ -Bundles Over Genus 1 Surfaces with a Hole	247
8.4	$(0, 4)$ -Bundles Over Tori with a Hole. Proof of Theorem 7.4	252
8.5	Smooth Elliptic Fiber Bundles and Differentiable Families of Complex Manifolds	258
8.6	Complex Analytic Families of Canonical Tori	262
8.7	Special $(0, 4)$ -Bundles and Double Branched Coverings	269

8.8	Lattices and Double Branched Coverings	272
8.9	The Gromov-Oka Principle for $(1, 1)$ -Bundles over Tori with a Hole	285
9	Fundamental Groups and Bounds for the Extremal Length	289
9.1	The Fundamental Group and Extremal Length. Two Theorems ...	289
9.2	Coverings of $\mathbb{C} \setminus \{-1, 1\}$ and Slalom Curves	292
9.3	Building Blocks and Their Extremal Length.....	300
9.4	The Extremal Length of Words in π_1 . The Lower Bound.....	305
9.5	The Upper Bound of the Extremal Length for Words Whose Syllables Have Degree 2.....	315
9.6	The Extremal Length of Arbitrary Words in π_1 . The Upper Bound	321
9.7	The Extremal Length of 3-Braids	338
10	Counting Functions	345
11	Riemann Surfaces of Second Kind and Finiteness Theorems	357
11.1	Riemann Surfaces of First and of Second Kind and Finiteness Theorems.....	358
11.2	Some Further Preliminaries on Mappings, Coverings, and Extremal Length	363
11.3	Holomorphic Mappings into the Twice Punctured Plane.....	368
11.4	(g, m) -Bundles over Riemann Surfaces	386
A	Appendix	411
A.1	Several Complex Variables	411
A.2	A Lemma on Conjugation	412
A.3	Koebe's Theorem.....	414
