

Contents

Chapter 1. Introduction	1
Chapter 2. The symplectic group of rank two	7
Chapter 3. Spaces of automorphic forms	11
3.1. Automorphic forms	11
3.2. Induced representations and Eisenstein series	12
3.3. Decomposition along the cuspidal support	13
Chapter 4. Definition of the Franke filtration	17
4.1. Fixing the full cuspidal support	17
4.2. The category of triples	18
4.3. Definition and construction of the filtration	19
Chapter 5. Filtration for the support in a maximal parabolic subgroup	21
5.1. Analytic properties of Eisenstein series supported in a maximal parabolic subgroup	22
5.2. Results for the support in a maximal parabolic subgroup	23
Chapter 6. Analytic properties of Eisenstein series supported in the Borel subgroup	27
6.1. Eisenstein series on $GL_2(\mathbb{A})$ and $SL_2(\mathbb{A})$	27
6.2. Eisenstein series on $G(\mathbb{A})$	28
Chapter 7. Filtration for the support in the Borel subgroup: Statement of results	33
7.1. Plan for the statement of results	33
7.2. Fascicule de résultats	34
Chapter 8. Filtration for the support in the Borel subgroup: Proofs	45
8.1. Strategy and plan of the proof	45
8.2. Proof of Theorems 7.1–7.7	46
8.3. Proof of Theorem 7.8	59
Chapter 9. Properties and features of the filtration	61
9.1. The choice of the function T	61
9.2. Functional equations of Eisenstein series and colimits	63
9.3. Eisenstein series with square-integrable residues	68
9.4. Eisenstein series with non-square-integrable residues	72
Appendix A. Calculation of colimits	77
Bibliography	83
