

Contents

Preface	ix
Relative topological pressure of nonautonomous dynamical systems BAIMEI SHI, BILEL SELMI, and ZHIMING LI	1
Self-similar GIFS tilings of Euclidean space ANDREW VINCE	19
Statistics of weakly chaotic systems LEONID A. BUNIMOVICH and YAOFENG SU	53
Fixed flowers in hyperbolic laminations MD. ABDUL AZIZ, BRITTANY E. DUNCAN, and JOHN C. MAYER	77
Maximal inequalities for the ergodic Hilbert transform along sequences with cone condition and a local moving ergodic theorem DOĞAN ÇÖMEZ	101
Orders of oscillation motivated by Sarnak’s conjecture—Part II YUNPING JIANG	119
Reciprocal transformations and their discrete Maharam extensions CHRIS JOHNSON	135
Concatenations of periodic words in subshifts defined by linear orders and poles of the Artin-Mazur zeta function CHENXI WU	153
Dimensions and metric dyadic cubes EFSTATHIOS-K. CHRONTSIOS-GARITSIS	167
Asymptotic homotopical complexity of an infinite sequence of dispersing $2D$ billiards NANDOR SIMANYI	179
Operator theory of diffusion equations governed by self-similar measures PALLE E. T. JORGENSEN and JAMES TIAN	191
Generalised fractal interpolation functions with partial self-similarity using Rakotch contraction mappings GWANG-JIN O and VASILEIOS DRAKOPOULOS	221
