

## TABLE OF CONTENTS

Acknowledgements vii

### **Part I: Introduction**

1. Proficiency and Beliefs in Learning and Teaching Mathematics –  
An Introduction 3  
*Yeping Li and Judit N. Moschkovich*

2. About Alan H. Schoenfeld and His Work 9  
*Hugh Burkhardt and Yeping Li*

3. About Günter Törner and His Work 19  
*Hans Heinrich Brungs and Yeping Li*

### **Part II: Proficient Performance, Beliefs, and Metacognition in Mathematical Thinking, Problem Solving, and Learning**

4. Developing Problem Solving Skills in Elementary School –  
The Case of Data Analysis, Statistics, and Probability 33  
*Kristina Reiss, Anke M. Lindmeier, Petra Barchfeld and Beate Sodian*

5. Transmissive and Constructivist Beliefs of In-Service Mathematics  
Teachers and of Beginning University Students 51  
*Christine Schmeisser, Stefan Krauss, Georg Bruckmaier, Stefan Ufer  
and Werner Blum*

6. Building on Schoenfeld’s Studies of Metacognitive Control towards  
Social Metacognitive Control 69  
*Ming Ming Chiu, Karrie A. Jones and Jennifer L. Jones*

### **Part III: Proficient Performance, Beliefs, and Practices in Mathematics Teaching, and Ways to Facilitate Them**

7. The CAMTE Framework – A Tool for Developing Proficient Mathematics  
Teaching in Preschool 89  
*Pessia Tsamir, Dina Tirosh, Esther Levenson, Ruthi Barkai and  
Michal Tabach*

## TABLE OF CONTENTS

8. Integrating Noticing into the Modeling Equation <i>Miriam Gamoran Sherin, Rosemary S. Russ and Bruce L. Sherin</i>	111
9. Teaching as Problem Solving – Collaborative Conversations as Found Talk-Aloud Protocols <i>Ilana Seidel Horn</i>	125
10. Researching the Sustainable Impact of Professional Development Programmes on Participating Teachers’ Beliefs <i>Stefan Zehetmeier and Konrad Krainer</i>	139
11. Capturing Mathematics Teachers’ Professional Development in Terms of Beliefs <i>Bettina Roesken-Winter</i>	157
12. Mathematicians and Elementary School Mathematics Teachers – Meetings and Bridges <i>Jason Cooper and Abraham Arcavi</i>	179
<b>Part IV: Issues and Perspectives on Research and Practice</b>	
13. Methodological Issues in Research and Development <i>Hugh Burkhardt</i>	203
14. A Mathematical Perspective on Educational Research <i>Cathy Kessel</i>	237
15. Issues Regarding the Concept of Mathematical Practices <i>Judit N. Moschkovich</i>	259
<b>Part V: Reflections and Future Research Development</b>	
16. Looking Back and Ahead – Some Very Subjective Remarks on Research in Mathematics Education <i>Günter Törner</i>	279
17. Encore <i>Alan H. Schoenfeld</i>	287
