<i>List of Figures and Tables</i>	xi
<i>Preface</i>	xv
Part I Perspective and Prospective	1
<i>Chapter 1 The Concept of Skill in Nonverbal Communication: Implications for Understanding Social Interaction— Howard S. Friedman, University of California, Riverside</i>	2
Introduction	2
The Shift from Cognitions to Emotions	4
The Shift from Traits to Abilities	11
The Shift from Inferred States to Process	17
Discussion	22
<i>Commentary—Shirley Weitz, New School for Social Research</i>	28

Part II	Interactional Aspects of Individual Differences	31
<i>Chapter 2 Gender, Gender Roles, and Nonverbal Communication Skills—Judith A. Hall, The Johns Hopkins University</i>		
		32
	Gender Differences in Ability to Decode Nonverbal Cues	35
	Gender Differences in Ability to Encode Nonverbal Cues	42
	What Might Account for These Gender Differences?	44
	Testing the Empathy Hypothesis	47
	Testing the Masculinity-Femininity Hypothesis for Decoding	50
	Testing the Responding-to-Oppression Hypothesis	54
	Conclusions and Further Speculations	57
<i>Chapter 3 Sex Differences in Accommodation in Nonverbal Communication—Robert Rosenthal, Harvard University, and Bella M. DePaulo, University of Virginia</i>		
		68
	Introduction	68
	Study Series I	71
	Study Series II	73
	Study Series III	88
	Summary and Conclusions	96
<i>Chapter 4 Nonverbal Skill and the Physician-Patient Relationship—M. Robin DiMatteo, University of California, Riverside</i>		
		104
	Introduction	104
	The Search for the Socioemotional Dimension of Patient Care	107
	Nonverbal Decoding and Encoding Skill in the Physician-Patient Relationship	110
	Evidence for the Importance of Decoding and Encoding Skill	112
	Overview of the Research	113
	The Criterion Measure: Patient Ratings of Satisfaction	117
	Results	120
	Conclusions	128

<i>Commentary: Interactional Aspects—Shirley Weitz, New School for Social Research</i>	135
Part III Basic Processes and Measures	139
<i>Chapter 5 Individual Differences in Nonverbal Sending Accuracy and Electrodermal Responding: The Externalizing-Internalizing Dimension—Ross Buck, University of Connecticut</i>	140
The Definition of Sending Accuracy	141
The Slide-Viewing Paradigm	141
The Relationship of Sending Accuracy and Physiological Responding	142
General Findings	143
“Internalizing” and “Externalizing” Modes of Response to Emotion	145
Theories of the Externalizing-Internalizing Phenomenon	156
The Facial Feedback Hypothesis	160
Conclusions	165
<i>Chapter 6 Individual Differences in Perceived Encoding and Decoding Abilities—Miron Zuckerman and Deborah T. Larrance, University of Rochester</i>	171
Introduction	171
Construction of the PEA and the PDA Scales	176
Preliminary Analysis: Sex Differences, Reliability, and Correlations with Other Scales	180
Relationship between Perceived and Actual Nonverbal Skills	183
Summary and Conclusions	190
<i>Appendix 1: PEA Items</i>	194
<i>Appendix 2: PDA Items</i>	199
<i>Chapter 7 Ambivalence, Discrepancy, and Deception in Nonverbal Communication—Bella M. DePaulo, University of Virginia, and Robert Rosenthal, Harvard University</i>	204
Processing Multimodal Cues	206
The Communication of Pure and Mixed Messages	223

Awareness of One's Own Nonverbal Skill	239
Summary and Conclusions	239
<i>Commentary: Basic Processes and Measures—Shirley Weitz, New School for Social Research</i>	249
<i>Name Index</i>	251
<i>Subject Index</i>	259
<i>About the Editor and Contributors</i>	269
