

Contents

Chapter 1. Introduction	1
Chapter 2. Preliminaries	5
2.1. Notations	5
2.2. Measurability	6
2.3. Tensor products of Banach spaces	8
2.4. Vector-valued integration	12
Chapter 3. Moments of Banach space valued random variables	19
3.1. Moments	19
3.2. Examples	27
Chapter 4. The approximation property	31
Chapter 5. Hilbert spaces	37
Chapter 6. $L^p(\mu)$	45
Chapter 7. $C(K)$	49
Chapter 8. $c_0(S)$	63
Chapter 9. $D[0, 1]$	67
9.1. $D[0, 1]$ as a Banach space	67
9.2. $D[0, 1]$ as a Banach algebra	68
9.3. Measurability and random variables in $D[0, 1]$	71
9.4. Moments of $D[0, 1]$ -valued random variables	77
Chapter 10. Uniqueness and Convergence	85
10.1. Uniqueness	85
10.2. Convergence	86
Appendix A. The Reproducing Hilbert Space	95
Appendix B. The Zolotarev Distances	101
B.1. Fréchet differentiability	101
B.2. Zolotarev distances	103
Bibliography	107
