|  |             |
|--|-------------|
| <b>Preface</b>   | <i>xvii</i> |
| <b>To the Student</b>                                    | <i>xx</i>   |
| <b>PART I THE NATURE OF LEARNING AND HUMAN ABILITIES</b> | <b>1</b>    |
| <b>1 The Scope of Educational Psychology</b>             | <b>4</b>    |
| Primary Emphases in Educational Psychology               | 6           |
| 1. Learning and Human Abilities                          | 7           |
| 2. A System of School Learning                           | 9           |
| 3. Achieving Learning Outcomes                           | 19          |
| 4. Measurement, Evaluation, and Research Design          | 21          |
| Other Concerns of Educational Psychology                 | 23          |
| Human Development and Exceptional Children               | 23          |
| School Psychology and Counseling                         | 24          |
| Research and Development in Educational Psychology       | 25          |
| Research   | 25          |
| Development of Products                                  | 29          |
| Summary  | 30          |
| Suggestions for Further Reading                          | 31          |
| <b>2 Learning Theories and Principles</b>                | <b>34</b>   |
| Purposeful Learning                                      | 35          |
| Purposeful Learning by an Individual                     | 36          |
| Purposeful Learning in a School Setting                  | 39          |
| Classical and Operant Conditioning                       | 42          |
| Classical Conditioning                                   | 42          |
| Operant Conditioning                                     | 44          |
| Schedules of Reinforcement                               | 45          |
| Successive Approximation                                 | 46          |
| Forgetting and Conditioning                              | 47          |
| Drives and Conditioning                                  | 47          |
| Stimulus Generalization and Response Discrimination      | 48          |
| Application to School Learning                           | 49          |
| Observational Learning and Imitation                     | 50          |
| Models Imitated  | 51          |

|  |            |
|--|------------|
| The Effects of Imitation                                 | 51         |
| Some Factors Affecting Imitation                         | 53         |
| Forgetting Imitative Responses                           | 54         |
| Application to School Learning                           | 55         |
| Meaningful Learning                                      | 57         |
| Types of Learning  | 58         |
| Internal Processes and Structures                        | 59         |
| Variables in Meaningful Learning                         | 60         |
| Motivation and Meaningful Learning                       | 61         |
| Application to School Learning                           | 62         |
| Informational Theory                                     | 64         |
| Contents, Products, and Operations                       | 65         |
| Principles in Informational Theory                       | 66         |
| Summary  | 68         |
| Suggestions for Further Reading                          | 69         |
| <b>3 Human Abilities</b>                                 | <b>71</b>  |
| Identification and Organization of Abilities             | 72         |
| Performances of a High School Senior                     | 72         |
| Attributes of Abilities                                  | 73         |
| Identification Through Factor Analysis                   | 74         |
| A Hierarchy of Abilities                                 | 77         |
| Cognitive Abilities                                      | 80         |
| Three Methods of Identification                          | 80         |
| The Structure of Intellect (SI)                          | 81         |
| Divergent-Production Abilities                           | 84         |
| Use of SI Tests in Prediction                            | 91         |
| Cognitive Abilities of High School Students              | 93         |
| An Informal Approach to Cognitive Abilities              | 99         |
| Psychomotor Abilities                                    | 102        |
| A Matrix of Psychomotor Abilities                        | 103        |
| Abilities and Physical Fitness                           | 105        |
| Psychomotor Abilities and Educational Achievement        | 106        |
| Affective Operations and Characteristics                 | 107        |
| Summary  | 110        |
| Suggestions for Further Reading                          | 110        |
| <b>PART II COMPONENTS OF A SYSTEM OF SCHOOL LEARNING</b> | <b>113</b> |
| <b>4 Educational and Instructional Objectives</b>        | <b>116</b> |
| Attributes of Objectives                                 | 117        |
| Purposes of Objectives                                   | 117        |
| Outcomes Incorporated in Objectives                      | 121        |
| Explicitness and Detail                                  | 122        |

|   |            |
|---|------------|
| Educational Objectives                                    | 124        |
| Elementary Education                                      | 126        |
| Secondary Education                                       | 127        |
| Schools for Slums and Suburbs                             | 130        |
| Education and Social Needs                                | 130        |
| Instructional Objectives                                  | 132        |
| Instructional Objectives: Concept <i>Quadrilateral</i>    | 133        |
| Instructional Objectives: Concept <i>Suffix</i>           | 138        |
| Instructional Objectives: Skills                          | 139        |
| Summary   | 140        |
| Suggestions for Further Reading                           | 141        |
| <b>5 Instructional Materials and Related Technology</b>   | <b>143</b> |
| Types and Uses of Instructional Materials                 | 144        |
| Historical Note on Instructional Materials and Technology | 144        |
| Uses of Various Materials                                 | 146        |
| Improving the Quality of Instructional Materials          | 147        |
| Instructional Television                                  | 152        |
| Student Achievement and Attitudes Toward ITV              | 152        |
| General Conditions Favorable to ITV                       | 155        |
| Some Limitations of ITV                                   | 157        |
| Specific Conditions That Facilitate Student Learning      | 158        |
| Programed Instructional Materials                         | 160        |
| A Note on the Historical Setting                          | 161        |
| Linear Programed Material                                 | 162        |
| Branching or Intrinsic Programed Material                 | 168        |
| Adjunct Programed Material                                | 170        |
| Student Achievement and Programed Instruction             | 171        |
| Computers in Education and Instruction                    | 174        |
| Computers in Educational Research                         | 174        |
| Computers in Information Storage and Retrieval            | 175        |
| Computer-Managed Instruction                              | 178        |
| Computer-Assisted Instruction                             | 181        |
| Evaluation of Computers in Education                      | 189        |
| Summary   | 190        |
| Suggestions for Further Reading                           | 191        |
| <b>6 Characteristics of Students</b>                      | <b>193</b> |
| Characteristics in Which Students Vary                    | 194        |
| Intellectual Abilities and Other Characteristics          | 195        |
| Psychomotor Abilities and Physical Characteristics        | 202        |
| Affective Characteristics                                 | 204        |
| Sex Roles   | 205        |
| Disadvantaged Students and Impoverished Environments      | 208        |

|  |            |
|--|------------|
| Environmental Contributors to Disadvantage                     | 209        |
| Characteristics of Disadvantaged Students                      | 214        |
| Educational Provisions for Disadvantaged Students              | 223        |
| A Physically Safe Environment                                  | 223        |
| Preschool Education  | 224        |
| Post-High School Training                                      | 226        |
| Integration  | 227        |
| Individually Guided Education for All Children                 | 228        |
