Series Preface: Pharmaceutical Nanotechnology	xxi
Preface	xxiii

CHAPTER 1 Vesicle-based drug carriers: Liposomes, polymersomes, and niosomes	1
<i>Nily Dan</i>	
1.1 Introduction	1
1.2 Amphiphilic Bilayers	4
1.3 Liposomal Drug Carriers	7
1.4 Polymersome Drug Carriers.....	11
1.5 Niosome Drug Carriers	14
1.6 Biomedical Applications	15
1.7 Discussion.....	22
1.8 Conclusion.....	24
References.....	25
CHAPTER 2 Recent advances in micellar-like polyelectrolyte/protein complexes: Design and development of biopharmaceutical vehicles	57
<i>Natassa Pippa, Stergios Pispas and Costas Demetzos</i>	
2.1 Introduction	57
2.2 Polyelectrolyte Block Copolymers	60
2.2.1 Physicochemical Properties	60
2.2.2 Solution Properties of Polyelectrolytes	62
2.2.3 Biological Properties.....	64
2.3 Polyelectrolyte–Protein Complexes.....	67
2.3.1 Preparation and Physicochemical Characterization of Polyelectrolyte-Protein Complexes	68
2.3.2 Biological Properties and Biomedical Applications of Polyelectrolyte-Protein Complexes	70
2.4 Polyelectrolyte-Protein Complexes Versus Other Nanocarriers	79
2.5 Conclusions and Future Perspectives	80
References.....	81
Further Reading	87

CHAPTER 3	Calixarene-based micelles: Properties and applications.....	89
	<i>Grazia M.L. Consoli, Giuseppe Granata and Corrada Geraci</i>	
3.1	Introduction	89
3.2	Physicochemical Characterization of Micellar Calixarenes.....	92
3.3	Anionic Calixarene Micelles.....	98
3.4	Cationic Calixarene Micelles	107
3.5	Micelles Formed by Zwitterionic Calix[4]arene Derivatives ...	114
3.6	Micelles Based on Nonionic Calixarenes	115
3.7	Calixarene Reversed Micelles.....	117
3.8	Bicomponent Calixarene-Based Micelles.....	119
3.9	Stimuli Responsive Micellar Calixarenes.....	127
3.10	Biomedical and Pharmaceutical Applications of Micellar Calixarenes	132
3.10.1	Micellar Calixarenes as Drug Solubilizers.....	132
3.10.2	Micellar Cationic Calixarene for DNA Binding and Cell Transfection.....	133
3.10.3	Calixarene Micelles for Drug Delivery	135
3.10.4	Calixarene Micelles for Imaging, Diagnostic, and Therapy.....	136
3.11	Conclusions	137
	References.....	138
	Further Reading	143
CHAPTER 4	Preparation of Janus nanoparticles and its application in drug delivery	145
	<i>Sepideh Khoei and Akram Nouri</i>	
4.1	Introduction	145
4.2	Different Types of Janus Materials	146
4.2.1	Inorganic–Inorganic Janus Materials.....	147
4.2.2	Polymer–Polymer Janus Materials	148
4.2.3	Organic–Inorganic Janus Materials	150
4.3	Different Methods for Fabrication of Janus Nanoparticles.....	150
4.3.1	Self-Assembly	151
4.3.2	Masking.....	155
4.3.3	Phase Separation	163
4.4	Properties of Janus Nanoparticles.....	171
4.5	Importance of Janus Nanoparticles in Biomedical Field	172

4.6	Several Applications of Janus Nanoparticles in Biomedical Fields.....	173
4.7	Conclusion.....	175
	References.....	175
CHAPTER 5	Supramolecular design of hydrophobic and hydrophilic polymeric nanoparticles	181
	<i>Leonardo M.B. Ferreira, Charlene P. Kiill, Liliane N. Pedreiro, Aline M. Santos and Maria Palmira D. Gremião</i>	
5.1	Introduction	182
5.2	Supramolecular Design of Polymeric Nanoparticles	184
	5.2.1 Polymeric Building Blocks for the Fabrication of Nanoparticles.....	186
	5.2.2 Self-Assembly and Supramolecular Forces.....	190
	5.2.3 Engineering Hydrophilic Nanoparticles	191
	5.2.4 Engineering Hydrophobic Nanoparticles	194
5.3	Tools and Techniques to Monitor Self-Assemblies	199
	5.3.1 Static and Dynamic Light Scattering	199
	5.3.2 Small and Wide Angle X-ray Scattering.....	201
	5.3.3 Calorimetry	202
	5.3.4 Fourier Transform Infrared and Ultraviolet–Visible Light Absorption Spectroscopy	204
	5.3.5 Fluorescence Spectroscopy	204
	5.3.6 Nuclear Magnetic Resonance Spectroscopy	205
	5.3.7 Scanning Electron Microscopy and Transmission Electron Microscopy	206
	5.3.8 Atomic Force Microscopy	207
5.4	Challenges and Future Directions.....	208
	Acknowledgments	208
	References.....	209
	Further Reading	221
CHAPTER 6	Cationic polyelectrolyte–biopolymer complex hydrogel particles for drug delivery	223
	<i>Sabyasachi Maiti, Sougata Jana and Bibek Laha</i>	
6.1	Introduction	223
6.2	Factors Affecting the Synthesis of Polyelectrolyte Complex Hydrogels.....	225
6.3	Drug Delivery Applications	228
	6.3.1 Poly-L-Lysine Based Systems.....	228
	6.3.2 Chitosan-Based Systems	234

6.3.3	Polyethyleneimine Complex	240
6.3.4	Gelatin Complex	244
6.4	Conclusion	248
	References.....	248
CHAPTER 7	Smart micelleplexes: An overview of a promising and potential nanocarrier for alternative therapies.....	257
	<i>Mariana Magalhães, Ana Figueiras and Francisco Veiga</i>	
7.1	Introduction	257
7.1.1	Nucleic Acid-Based Drugs for Alternative Therapies ...	259
7.2	Smart Micelleplexes.....	261
7.2.1	Micelleplexes as Non-Viral Vectors.....	261
7.2.2	Synthesis, Structure and Characterization.....	263
7.2.3	Smart Micelleplexes for Site-Directed Delivery	270
7.2.4	Advantages of Smart Micelleplexes	273
7.3	Therapeutic Approaches Using Micelleplexes	277
7.4	Conclusions and Future Perspectives	279
	Acknowledgments	280
	References.....	280
CHAPTER 8	Polymeric micelles as a versatile tool in oral chemotherapy	293
	<i>Andreza M. Ribeiro, Cláudia Amaral, Francisco Veiga and Ana Figueiras</i>	
8.1	Introduction	293
8.1.1	Barriers and Intestinal Transport in Oral Drug Delivery Systems	296
8.2	An Overview of Oral Chemotherapy.....	297
8.3	Polymeric Micelles.....	297
8.3.1	Advances in Polymers and Copolymers.....	299
8.3.2	Definition, Structure and Preparation.....	302
8.3.3	Polymeric Micelles With Modified Surface.....	304
8.3.4	Diagnostic by Polymeric Micelles.....	307
8.4	Polymeric Micelles as an Alternative Strategy for Oral Chemotherapy	309
8.5	Polymeric Micelles in Cancer Clinical Trials	312
8.6	Conclusions and Future Perspectives	317
	Acknowledgments	318
	References.....	318

CHAPTER 9	Mixed micelles as drug delivery nanocarriers.....	331
	<i>Jan Sobczyński and Beata Chudzik-Rząd</i>	
9.1	Physicochemical Basis for Mixed Micelles Formation.....	331
9.1.1	Excipients	331
9.1.2	Micellization Process	332
9.2	Mixed Micelles as Drug Delivery Nanocarriers.....	333
9.2.1	Excipients	333
9.2.2	Optimizing Micellar Properties	334
9.2.3	Mixed Micelle Formation	335
9.2.4	Mixed Micellar Characterization.....	337
9.3	Solubilization of Drugs and Drug-Like Molecules in Mixed Micellar Systems	338
9.4	Mixed Micellar Formulation for Antineoplastic Agents.....	342
9.4.1	Micellar Delivery Systems in Cancer Therapy	342
9.4.2	Examples of Anticancer Formulations	345
9.5	Examples of Other Mixed Micellar Systems	352
9.6	Conclusions	356
	References.....	356
	Further Reading	364
CHAPTER 10	Amphiphilic block copolymers–based micelles for drug delivery	365
	<i>Muhammad Imran, Muhammad R. Shah and Shafiullah</i>	
10.1	Introduction	366
10.2	Amphiphilic block copolymers.....	367
10.3	Micelles formation	369
10.3.1	Thermodynamics of Micellization.....	370
10.3.2	Amphiphilic Block Copolymers Micelles Advantages	371
10.3.3	Types of Polymeric Micelles.....	372
10.3.4	Drug-Loaded Micelles Preparation.....	373
10.3.5	Factors Affecting Micelles Formation.....	375
10.4	Characterization of block copolymers micelles	377
10.4.1	Critical Micelle Concentration	377
10.4.2	Size	379
10.4.3	Surface Morphology	380
10.4.4	Zeta Potential	382
10.4.5	Stability	382
10.4.6	In Vitro Drug Release Behavior.....	383

10.5	Factors affecting the properties of micelles	383
10.5.1	Hydrophilic–Hydrophobic Balance	384
10.5.2	Concentration of the Copolymer	384
10.5.3	Drug Loading and Drug Loading Methods	385
10.6	Block copolymers micelles applications	385
10.6.1	Solubilization of Drugs	385
10.6.2	Sustained Release.....	386
10.6.3	Enhanced Oral Bioavailability.....	386
10.6.4	Drug-Targeting Applications	387
10.7	Limitations of micelles	393
10.7.1	Low Drug Loading and Encapsulation Efficiency	393
10.7.2	Poor Stability of the Micelles.....	394
10.8	Conclusion.....	394
	References.....	394

CHAPTER 11 Synthesis and evolution of polymeric nanoparticles: Development of an improved gene delivery system 401

R. Mankamna Kumari, Nikita Sharma, Nidhi Gupta, Ramesh Chandra and Surendra Nimesh

11.1	Introduction	402
11.2	Methods for Synthesis of Polymeric Nanoparticles	403
11.2.1	Strategies Involved in the Synthesis of Polymeric Nanoparticles.....	404
11.3	Barriers to Successful Gene Delivery Mediated by Polymeric Nanoparticles	408
11.3.1	Extracellular Barriers	408
11.3.2	Intracellular Barriers	409
11.3.3	Nucleic Acid Packaging.....	409
11.3.4	Cell-Specific Delivery	410
11.4	Physicochemical Characterization of Polymeric Nanoparticles	411
11.4.1	Determination of Size and Size Distribution	411
11.4.2	Determination of Surface Charge.....	412
11.4.3	Nanoparticle Tracking Analysis	412
11.5	Polymeric Nanoparticles for Gene Delivery	413
11.6	Poly(Lactic-Co-Glycolic) Acid.....	413
11.6.1	Lipid-PLGA Hybrid Nanoparticles	413
11.6.2	PEI-Modified PLGA Nanoparticles for Enhanced Delivery.....	414
11.6.3	Chitosan-Modified PLGA Nanoparticles	414

11.7	Chitosan.....	416
11.7.1	Chitosan in DNA Delivery	416
11.7.2	Chitosan in siRNA Delivery.....	418
11.8	Polyethylenimine	420
11.8.1	Polyethylenimine in DNA Delivery	420
11.8.2	PEI in siRNA Delivery	422
11.9	Dendrimers	424
11.9.1	Poly(Amidoamine) Dendrimers.....	424
11.9.2	Poly(Propylenimine) Dendrimers	425
11.9.3	Carbosilane Dendrimers.....	425
11.10	Polymeric Gene Delivery System in Clinical Trials.....	426
11.11	Conclusion.....	428
	References.....	428

CHAPTER 12 Therapeutic protein and drug imprinted nanostructures as controlled delivery tools..... 439

Handan Yavuz, Kemal Çetin, Semra Akgönüllü, Dilek Battal and Adil Denizli

12.1	Controlled Delivery of Drugs	439
12.2	Polymers for the Drug Delivery Systems.....	441
12.2.1	Nanocarriers for Drug Delivery.....	443
12.3	Molecular Recognition and Molecular Imprinting Technology in Drug Delivery	446
12.4	Nanotechnology in Molecular Imprinted Drug Delivery Systems.....	449
12.4.1	Nanoparticles for the Oral Delivery of Therapeutics	451
12.4.2	Nanoparticles for the Ocular Delivery of Drugs.....	461
12.4.3	Nanoparticles for the Dermal/Transdermal Drug Delivery	462
12.5	Conclusion.....	463
	References.....	464

CHAPTER 13 Application of complex coacervates in controlled delivery..... 475

Merve D. Köse, Oguz Bayraktar and Özge K. Heinz

13.1	Introduction	475
13.2	General Aspects of Complex Coacervation.....	477
13.2.1	Synthetic Polyelectrolyte Complexes.....	477
13.2.2	Natural Polyelectrolyte Complexes	477

13.3	Models on Formation of Coacervate Systems.....	483
13.4	Biopolymers Used in Complex Coacervation	485
13.5	Characterization of Complex Coacervates	485
13.6	Protein–Polysaccharide Complexation	488
13.7	Complex Coacervation in Controlled Delivery	494
	13.7.1 Encapsulation by Complex Coacervation	494
	13.7.2 Membranes by Complex Coacervation	498
13.8	Concluding Remarks	500
	References.....	501
	Further Reading	507

CHAPTER 14 Hydrogels: Biomedical uses..... 509

María-Dolores Veiga, Roberto Ruiz-Caro, Fernando Notario-Pérez, Araceli Martín-Illana and Raúl Cazorla-Luna

14.1	Introduction	510
14.2	Nanogels as Drug Carriers	513
14.3	Polymers Used in Nanogel Development.....	514
14.4	Manufacturing of Hydrogel Nanoparticles for Pharmaceutical Applications.....	517
	14.4.1 Methods to Obtain Nanogels	517
	14.4.2 Physicochemical Properties of Drugs Incorporated in Hydrogel Nanoparticles	523
	14.4.3 Strategies for Drug Loading in Nanogels.....	523
14.5	Characterization of Nanogels.....	524
14.6	Drug Release From Nanogels	526
	14.6.1 Physically Controlled Drug Release.....	527
	14.6.2 Chemically Controlled Drug Release	527
14.7	Optimization of Nanogels for Pharmacotherapeutic Applications.....	529
	14.7.1 Modifying the Geometry of the Nanoparticles.....	529
	14.7.2 Modifications on the Surface of the Nanoparticles.....	530
14.8	Applications of Nanogels in Therapeutics.....	531
	14.8.1 Low-Weight Molecule Therapy	531
	14.8.2 Macromolecule Therapy	533
	14.8.3 Scaffolds.....	535
	14.8.4 Nanolipogels.....	536
14.9	Conclusions and Future Perspectives	537
	References.....	538

CHAPTER 15 Technologies that generate and modify virus-like particles for medical diagnostic and therapy purposes	555
<i>Masaaki Kawano, Masanori Matsui and Hiroshi Handa</i>	
15.1 Introduction	556
15.2 Structure and Function of the Capsid of Simian Virus 40	556
15.3 Formation of Virus-Like Particles From the Simian Virus 40 Capsid Protein VP1	560
15.4 Formation of Virus-Like Particle Via Self-Reassembly Activity	562
15.5 Delivery of DNA into Cells by Virus-Like Particles Produced by DNA-Mediated Capsid Reassembly	564
15.6 Encapsulation of Bioactive Foreign Proteins into Virus-Like Particles and Their Delivery into Cells.....	568
15.7 Genetic or Chemical Modification of the Surface of Virus-Like Particles.....	571
15.8 VP1 Pentamer Coating of Artificial Beads	573
15.9 Use of Virus-Like Particle-Encapsulated Magnetite as an Magnetic Resonance Imaging Contrast Agent.....	574
15.10 Construction of Vaccines by Using Virus-Like Particles	575
15.11 Future Applications of Virus-Like Particle in Vaccine Therapy.....	584
15.12 Conclusions	587
Acknowledgments	587
References.....	587
CHAPTER 16 Layer-by-Layer coated drug-core nanoparticles as versatile delivery platforms	595
<i>Ana Cláudia Santos, Mariana Caldas, Pravin Pattekari, Carlos Fontes Ribeiro, António José Ribeiro, Yuri Lvov and Francisco Veiga</i>	
16.1 Introduction	596
16.2 Drug Candidates for LbL Nanoencapsulation	598
16.3 Preparation of Drug Nanocore Templates	599
16.3.1 Top-Down Approaches	599
16.3.2 Bottom-Up Approaches	603
16.3.3 Comparison Between Top-Down and Bottom-Up Approaches.....	607

16.4	Layer-by-Layer Coating Materials	607
16.4.1	Polyelectrolytes	610
16.4.2	Advanced Functional Coatings.....	610
16.4.3	Outermost Layer Functionalization	611
16.5	Layer-by-Layer Coating Procedure	613
16.5.1	Intermediate Washings.....	614
16.5.2	Washless Procedures.....	615
16.6	Controlled Drug Release.....	617
16.6.1	Natural Permeability of the LbL Shells	618
16.6.2	Stimuli-Responsive Permeability of the LbL Shells....	620
16.7	Stability Enhancement	621
16.7.1	Chemical Stability.....	621
16.7.2	Colloidal Stability	621
16.8	In Vitro Studies	622
16.9	In Vivo Studies.....	627
16.10	Conclusions and Future Perspectives	628
	Acknowledgements.....	629
	Abbreviations.....	630
	References.....	630

CHAPTER 17 Effect of α -dextrin nanoparticles on the structure of iodine complexes with polypeptides and alkali metal halogenides, and on the mechanisms of their anti-human immunodeficiency virus and anticancer activity 637

Gulnara A. Yuldasheva, Georgii M. Zhidomirov and Aleksandr I. Ilin

17.1	Introduction	638
17.2	Molecular Iodine Complexes With Bioorganic Ligand and Lithium Halogenides and Their Mechanism Anti-Human Immunodeficiency Virus Action	639
17.3	The Structure of Complex Iodine Compounds in Aqueous Solutions Containing Alkali Metal Halogenides and Amino Acid	642
17.4	The Effect of the Amphoteric Properties of Amino Acids in the Zwitterionic Form on Iodine–Triiodide Equilibrium in Aqueous Solutions, Containing Molecular Iodine and Alkali Metal Halogenides	650
17.5	UV Spectroscopy Research of Interaction $\text{LiCl(I)}\text{--I}_2\text{--}\alpha\text{-Dextrin--Peptide With Nucleotide Triplet AGA.....}$	658

17.6	Inhibition of Human Immunodeficiency Virus-1 Integrase Active Catalytic Center by Molecular Iodine Complexes With Bioorganic Ligands and Lithium Halogenides.....	664
17.7	The Effects of Anticancer Activity of Drug-Containing Complexes of Molecular Iodine With α -Dextrins, Polypeptides, and Lithium Halogenides	670
17.8	Conclusion	678
	Acknowledgment	679
	References.....	680
CHAPTER 18 Nanocarriers for the delivery of temozolomide in the treatment of glioblastoma: A review		
	<i>Maria J. Ramalho, Manuel A.N. Coelho and Maria C. Pereira</i>	687
18.1	Introduction	687
18.2	Glioblastoma.....	688
18.3	Current Therapies for Glioblastoma and Their Challenges	690
18.4	Temozolomide as Therapeutic Agent.....	691
	18.4.1 Pharmacological Activity of Temozolomide and Metabolites	692
	18.4.2 Challenge and Limitation of Temozolomide	694
18.5	Nanosystems for Brain Drug Delivery	696
18.6	Nanosystems for the Delivery of Temozolomide.....	700
	18.6.1 Polymeric Nanocarriers	700
	18.6.2 Lipid-Based Nanocarriers	708
	18.6.3 Other Nanocarriers.....	712
18.7	Conclusion	713
	Acknowledgments	714
	References.....	714
	Index	723
