

Essentials of
GENERAL, ORGANIC,
and **BIOCHEMISTRY**

THIRD EDITION

Denise Guinn
The College of New Rochelle

 macmillan
international
HIGHER EDUCATION

Brief Contents

| | | |
|------------|---|-------|
| Chapter 1 | Matter, Energy, and Measurement | 1 |
| Chapter 2 | Atomic Structure and Radioisotopes | 43 |
| Chapter 3 | Ionic and Covalent Compounds | 85 |
| Chapter 4 | Molecular Geometry, Polarity, and Intermolecular Forces of Attraction | 119 |
| Chapter 5 | Chemical Quantities and Introduction to Reactions | 153 |
| Chapter 6 | Chemical Reactions: Energy, Rates, and Equilibrium | 185 |
| Chapter 7 | Changes of State and the Gas Laws | 215 |
| Chapter 8 | Mixtures, Solution Concentrations, Osmosis, and Dialysis | 253 |
| Chapter 9 | Acids and Bases, pH, and Buffers | 299 |
| Chapter 10 | Introduction to Organic Chemistry: Hydrocarbon Structure | 341 |
| Chapter 11 | Alcohols, Phenols, Thiols, Ethers, and Amines | 397 |
| Chapter 12 | The Common Carbonyl-Containing Functional Groups | 439 |
| Chapter 13 | Common Organic Reactions in Biochemistry | 479 |
| Chapter 14 | Carbohydrates: Structure and Function | 523 |
| Chapter 15 | Lipids: Structure and Function | 567 |
| Chapter 16 | Proteins: Structure and Function | 599 |
| Chapter 17 | Nucleotides and Nucleic Acids | 643 |
| Chapter 18 | Energy and Metabolism | 681 |
| Appendix A | Basic Math Review with Guidance for Using a TI-30Xa Scientific Calculator | A-1 |
| Appendix B | Answers to Odd-Numbered Additional Exercises | B-1 |
| | Glossary/Index | G/I-1 |

Contents

| | | | |
|--|-----------|--|--|
| Preface | xv | | |
| Chapter 1 Matter, Energy, and Measurement | 1 | | |
| Concepts in Context: Osteoporosis and Measurement of Bone Density | 1 | | |
| 1.1 Matter and Energy | 2 | | |
| Kinetic and Potential Energy | 3 | | |
| 1.2 Units and Measurement | 6 | | |
| Systems of Measurement | 7 | | |
| Units of Length, Mass, and Volume | 9 | | |
| 1.3 Significant Figures in Measurements and Calculations | 13 | | |
| Significant Figures in a Measurement | 13 | | |
| Exact Numbers | 15 | | |
| Significant Figures in Calculations | 17 | | |
| 1.4 Dimensional Analysis | 18 | | |
| Using Dimensional Analysis in Metric-Metric Unit Conversions | 19 | | |
| English-Metric Conversions | 24 | | |
| Density Calculations | 25 | | |
| Dosage Calculations | 28 | | |
| 1.5 Temperature Scales and Conversions | 31 | | |
| The Temperature Scales | 31 | | |
| Temperature Conversions | 32 | | |
| Chemistry in Medicine: Matter, Energy, and Starvation | 34 | | |
| Chapter 2 Atomic Structure and Radioisotopes | 43 | | |
| Concepts in Context: The Micronutrients and Nutrition | 43 | | |
| 2.1 Elements and the Structure of the Atom | 45 | | |
| The Structure of the Atom | 46 | | |
| Elements and the Periodic Table | 46 | | |
| Isotopes of an Element | 49 | | |
| Average Atomic Mass | 51 | | |
| 2.2 Navigating the Periodic Table of the Elements | 52 | | |
| Groups and Periods | 52 | | |
| Metals, Nonmetals, and Metalloids | 53 | | |
| Important Elements in Biochemistry and Medicine | 54 | | |
| 2.3 Electron Arrangement and Valence Electrons | 56 | | |
| Energy Levels and the Arrangement of Electrons | 56 | | |
| Valence Electrons and Periodicity | 58 | | |
| 2.4 Radioisotopes: α Decay and β Decay | 61 | | |
| α decay | 61 | | |
| β decay | 63 | | |
| Half-Life | 64 | | |
| 2.5 High-Energy Electromagnetic Radiation | 67 | | |
| Electromagnetic Radiation | 67 | | |
| Radioisotopes That Emit Gamma Rays | 68 | | |
| 2.6 The Penetrating Power and Biological Effects of Radiation | 70 | | |
| Penetrating Power of Radiation | 70 | | |
| Radiation Sickness | 71 | | |
| Chemistry in Medicine: Electromagnetic Radiation in Medical Imaging | 73 | | |
| Chapter 3 Ionic and Covalent Compounds | 85 | | |
| Concepts in Context: What Is in Your Morning Coffee? | 85 | | |
| 3.1 Ionic Compounds Containing Monatomic Ions | 86 | | |
| Monatomic Cations and Anions | 88 | | |
| Writing the Formula Unit for an Ionic Compound | 93 | | |
| Writing the Name of an Ionic Compound from Its Formula Unit | 94 | | |
| 3.2 Ionic Compounds Containing Polyatomic Ions | 96 | | |
| 3.3 Covalent Compounds | 99 | | |
| The Covalent Bond | 99 | | |
| The Molecular Formula of a Covalent Compound | 100 | | |
| Naming Simple Binary Covalent Compounds | 100 | | |

| | | | |
|--|------------|---|------------|
| 3.4 Writing Lewis Dot Structures of Covalent Compounds | 102 | 5.2 Writing and Balancing Chemical Equations | 161 |
| The Process for Writing Lewis Dot Structures | 102 | The Law of Conservation of Mass | 162 |
| Extension Topic 3-1: Expanded Octets | 109 | Writing a Chemical Equation | 162 |
| Chemistry in Medicine: Blood Chemistry and the Diagnosis of Disease | 110 | Balancing a Chemical Equation | 164 |
| | | Mole-to-Mole Stoichiometry Calculations | 167 |
| Chapter 4 Molecular Geometry, Polarity, and Intermolecular Forces of Attraction | 119 | Extension Topic 5-1: Mass-to-Mass Stoichiometry Calculations | 169 |
| Concepts in Context: The Role of Estrogens in Breast Cancer | 119 | 5.3 Types of Chemical Reactions | 171 |
| 4.1 Three-Dimensional Shapes of Molecules | 120 | Combination Reactions | 171 |
| Molecular Models | 120 | Decomposition Reactions | 172 |
| Predicting Electron Geometry and Molecular Geometry | 121 | Single Replacement Reactions | 172 |
| Molecular Geometries of the Atoms in Larger Molecules | 126 | Double Replacement Reactions | 172 |
| 4.2 Bond Dipoles and Molecular Polarity | 127 | Oxidation–Reduction Reactions | 173 |
| Electronegativity | 128 | Chemistry in Medicine: Antacids and the Chemical Reactions That Relieve Acid Indigestion | 176 |
| Bond Dipoles | 129 | | |
| Nonpolar and Polar Molecules | 132 | Chapter 6 Chemical Reactions: Energy, Rates, and Equilibrium | 185 |
| 4.3 Intermolecular Forces of Attraction in a Compound | 136 | Concepts in Context: Food and Energy | 185 |
| Dispersion Forces | 137 | 6.1 Energy and Chemical Reactions | 186 |
| Dipole–Dipole Forces | 138 | Units of Energy: The Nutritional Calorie, Calorie (cal), and Joule (J) | 187 |
| Hydrogen Bonding Forces | 138 | Exothermic and Endothermic Reactions | 188 |
| Chemistry in Medicine: Designing Drugs to Treat Breast Cancer | 142 | The Calorie Content of Foods | 192 |
| | | An Overview of Energy and Metabolism in Cells | 194 |
| Chapter 5 Chemical Quantities and Introduction to Chemical Reactions | 153 | 6.2 Rates of Chemical Reactions | 195 |
| Concepts in Context: A Chemical Reaction That Saves Lives | 153 | Activation Energy, E_A | 196 |
| 5.1 Counting and Weighing Matter: The Mole | 155 | Factors Affecting the Rate of a Reaction | 198 |
| Molecular Mass and Formula Mass | 155 | 6.3 Chemical Equilibrium | 201 |
| The Mole and Avogadro's Number | 157 | Reversible Reactions and Equilibrium | 201 |
| The Mole and Molar Mass | 158 | Le Châtelier's Principle | 202 |
| Interconverting between Mass and Number of Particles | 160 | Chemistry in Medicine: The Human Calorimeter and Indirect Calorimetry | 206 |
| | | Chapter 7 Changes of State and the Gas Laws | 215 |
| | | Concepts in Context: Diver Rescue and the Bends | 215 |
| | | 7.1 Changes of State | 216 |
| | | Kinetic Energy versus Intermolecular Forces of Attraction | 217 |
| | | Energy Transfer and Changes of State | 217 |
| | | Melting and Boiling Points | 218 |
| | | Specific Heat | 223 |

| | | | |
|---|------------|---|------------|
| 10.6 Naming Substituted Hydrocarbons | 375 | 12.1 Introduction to the Carbonyl-Containing Functional Groups | 440 |
| Naming Substituted Alkanes | 375 | 12.2 Aldehydes | 441 |
| Naming Substituted Cycloalkanes | 376 | Aldehydes in Nature | 442 |
| Naming Substituted Alkenes and Alkynes | 379 | Naming Aldehydes | 443 |
| Naming Substituted Benzenes | 380 | 12.3 Ketones | 445 |
| Pharmaceuticals: IUPAC, Generic, and Brand Names | 382 | Ketones Found in Nature and in Pharmaceuticals | 446 |
| Chemistry in Medicine: The Chemistry of Vision | 382 | Naming Ketones | 447 |
| | | 12.4 Carboxylic Acids | 450 |
| Chapter 11 Alcohols, Phenols, Thiols, Ethers, and Amines | 397 | Identifying a Carboxylic Acid Functional Group | 450 |
| <hr/> | | Carboxylic Acids and Carboxylate Ions | 452 |
| Concepts in Context: Opioids and Their Abuse | 397 | Carboxylic Acids in Nature and in Pharmaceuticals | 452 |
| 11.1 Introduction to Functional Groups in Organic Chemistry | 399 | Naming Carboxylic Acids | 455 |
| The Hydrocarbon Functional Groups | 399 | 12.5 Esters | 456 |
| Writing Skeletal Line and Condensed Structures for Molecules with Carbon-Heteroatom Bonds | 400 | Identifying an Ester Functional Group | 457 |
| 11.2 Alcohols | 402 | Esters in Nature and in Pharmaceuticals | 458 |
| Naming Alcohols | 404 | IUPAC Rules for Naming Esters | 461 |
| Types of Alcohols | 405 | 12.6 Amides | 462 |
| Diols, Triols, and Polyols in Nature and Industry | 407 | Amides in Nature and in Pharmaceuticals | 464 |
| Physical Properties of Alcohols | 408 | Naming Amides | 466 |
| 11.3 Phenols | 410 | Chemistry in Medicine: L-Dopa, a Treatment for Parkinson's Disease | 468 |
| Phenols in Nature and Industry | 410 | | |
| Naming Phenols | 411 | Chapter 13 Common Organic Reactions in Biochemistry | 479 |
| 11.4 Thiols | 413 | <hr/> | |
| Naming Simple Thiols | 413 | Concepts in Context: How Does the Body Handle Alcoholic Beverages? | 479 |
| Thiols in Nature and in Industry | 414 | 13.1 Oxidation–Reduction Reactions | 481 |
| 11.5 Ethers | 417 | Oxidation and Reduction Reactions of Organic Substrates | 481 |
| Ethers as Anesthetics and Pharmaceuticals | 417 | Oxidation and Reduction of Common Functional Groups | 483 |
| 11.6 Amines and Their Chemical Reactivity as Bases | 420 | 13.2 Esterification, Thioesterification, and Amidation Reactions | 492 |
| Types of Amines | 421 | Formation of Esters and Thioesters | 493 |
| Physical Properties of Amines | 421 | Amidation Reactions | 498 |
| Physiological and Pharmacological Activity of Amines | 423 | 13.3 Hydrolysis Reactions | 500 |
| Amines Are Weak Organic Bases | 425 | Applications of Hydrolysis Reactions | 504 |
| Chemistry in Medicine: The Role of Dopamine in Schizophrenia | 428 | 13.4 Hydration and Dehydration Reactions | 505 |
| | | Hydration Reactions | 506 |
| Chapter 12 The Common Carbonyl-Containing Functional Groups | 439 | Dehydration Reactions | 507 |
| <hr/> | | Chemistry in Medicine: Are You Getting Your Vitamins? | 510 |
| Concepts in Context: Clean It with Soap! | 439 | | |

Chapter 14 | Carbohydrates: Structure and Function 523

- Concepts in Context:** Dental Caries and the Sweet Tooth 523
- 14.1** An Overview of Carbohydrates and Their Function 524
Types of Carbohydrates 525
- 14.2** Stereoisomers 526
Chirality 526
Enantiomers 528
- Extension Topic 14-1:** Converting from a Skeletal Line Structure to a Fischer Projection 531
Diastereomers: Stereoisomers with More Than One Chirality Center 534
- 14.3** The Structures of the Common Monosaccharides 537
The Chemical Structures of Monosaccharides 537
The Ring Forms of Monosaccharides 540
- 14.4** The Structure of Complex Carbohydrates 545
Disaccharides 545
Polysaccharides 549
- 14.5** The Role of Oligosaccharides as Cell Markers 552
- Chemistry in Medicine:** Blood Glucose Levels and Diabetes 554

Chapter 15 | Lipids: Structure and Function 567

- Concepts in Context:** Anabolic Steroids and Their Abuse by Professional Athletes 567
- 15.1** Fatty Acids 569
Types of Fatty Acids 570
Shapes and Physical Properties of Fatty Acids 570
The Delta and Omega Systems 571
- 15.2** Triacylglycerols: Energy Storage Lipids 573
Triacylglycerols as Energy Storage Molecules 573
The Chemical Structure of Triacylglycerols 574
- 15.3** Membrane Lipids: Phospholipids and Glycolipids 576
The Chemical Structure of Phospholipids and Glycolipids 576
The Cell Membrane 581

- 15.4** Cholesterol, Steroids, and Lipoproteins 583
Bile Salts 584
Steroid Hormones 584
Lipoproteins and Cholesterol 585

Chemistry in Medicine: Inflammation and the Eicosanoids 587

Chapter 16 | Proteins: Structure and Function 599

- Concepts in Context:** Sickle-Cell Anemia and the Effect of One Wrong Amino Acid 599
- 16.1** Amino Acids 601
pH and Amino Acid Equilibria 602
Amino Acids and Their Side Chains 603
The Chirality of Amino Acids 607
Essential Amino Acids 609
- 16.2** Peptides 610
Peptide Bonds 610
- 16.3** Protein Structure 613
The Primary Structure of a Protein 614
The Secondary Structure of a Protein 615
The Tertiary Structure of a Protein 619
The Quaternary Structure of a Protein 621
The Four Levels of Protein Architecture Applied to Hemoglobin 622
Types of Proteins: Fibrous and Globular 623
Denaturation of a Protein 624
- 16.4** Enzymes and Enzyme Inhibitors 625
The Enzyme-Substrate Complex 625
pH and Temperature Dependence of Enzymes 626
Enzyme Inhibitors 627
- Chemistry in Medicine:** ACE Inhibitors, a Treatment for High Blood Pressure 629

Chapter 17 | Nucleotides and Nucleic Acids 643

- Concepts in Context:** Gene Mutations and Disease 643
- 17.1** The Chemical Structure of Nucleotides and Polynucleotides 645
The Monosaccharide 645
The Nitrogenous Base 646
The Monophosphate Ester 647

| | | | |
|--|------------|--|-------|
| Constructing Polynucleotides from Nucleotides | 650 | | |
| 17.2 DNA Structure and Replication | 653 | | |
| Double Helix Structure of DNA | 653 | | |
| Genes, Chromosomes, and the Human Genome | 655 | | |
| DNA Replication | 658 | | |
| 17.3 The Role of DNA and RNA in Protein Synthesis | 661 | | |
| Transcription: DNA to mRNA | 662 | | |
| Translation | 663 | | |
| Genetic Mutations | 668 | | |
| <u>Chemistry in Medicine:</u> The Retrovirus HIV and Its Life Cycle in a T-lymphocyte | 669 | | |
| | | | |
| Chapter 18 Energy and Metabolism | 681 | | |
| <hr/> | | | |
| <u>Concepts in Context:</u> Exercise and Weight Loss | 681 | | |
| 18.1 Energy and Metabolism: An Overview | 682 | | |
| 18.2 Carbohydrate Catabolism: Glycolysis and Pyruvate Metabolism | 688 | | |
| Glycolysis | 688 | | |
| The Metabolism of Pyruvate | 690 | | |
| 18.3 The Citric Acid Cycle | 692 | | |
| An Overview of the Citric Acid Cycle | 692 | | |
| A Closer Look at the Steps of the Citric Acid Cycle | 693 | | |
| 18.4 The Electron Transport Chain and Oxidative Phosphorylation | 695 | | |
| Where It All Happens: The Mitochondria | 695 | | |
| The Electron Transport Chain and the Proton Motive Force | 696 | | |
| Oxidative Phosphorylation: Harnessing the Potential Energy of the Proton Motive Force | 700 | | |
| Net ATP Production from the Complete Oxidation of Glucose | 701 | | |
| 18.5 β-Oxidation of Fatty Acids | 702 | | |
| Activation of a Fatty Acid to Fatty Acyl-CoA | 702 | | |
| β -Oxidation | 702 | | |
| <u>Chemistry in Medicine:</u> Inhibitors of the Electron Transport Chain | 705 | | |
| | | | |
| Appendix A: Basic Math Review with Guidance for Using a TI-30Xa Scientific Calculator | | | A-1 |
| Appendix B: Answers to Odd-Numbered Additional Exercises | | | B-1 |
| Glossary/Index | | | G/I-1 |
