

Ultrasound Scanning Guide for Obstetrics and Gynecology

Haleema Rauf, RDMS (AB, OB/GYN, PS), RMSKS, RVT, CRGS, CRVS

Sonography Consultant, Independent Practice, Ontario, Canada

Registered Generalist and Vascular Sonographer (Sonography Canada®)

Registered Diagnostic Medical Sonographer® (American Registry for Diagnostic Medical Sonography®, ARDMS®), specializing in abdominal, obstetric and gynecologic, pediatric, musculoskeletal, and vascular ultrasound

Leonardo Faundez, MA-Ed, BSc, RDMS (AB, OB/GYN), RVT, DMS, CRGS, CRVS

Founder and Director, Aprende Canada

Sonography Educator and Lecturer

Registered Generalist and Vascular Sonographer (Sonography Canada®)

Registered Diagnostic Medical Sonographer® (American Registry for Diagnostic Medical Sonography®, ARDMS®), specializing in abdominal, obstetric and gynecologic, and vascular ultrasound

Lifetime Achievement Award Recipient, Sonography Canada®

Toronto, Ontario, Canada

Contents

Preface	<i>viii</i>
Acknowledgements	<i>ix</i>
List of Abbreviations	<i>x</i>
1 Introduction	1
1.1 Learning Approach	1
1.2 Prerequisites for Guidebook	2
1.3 Common Terminology Used in Guidebook	2
1.4 Ultrasound Images	2
1.5 Transparency of Ultrasound Image Editing	3
1.6 Ergonomics	3
Bibliography	3
2 Transabdominal Ultrasound Scanning of Female Pelvis	4
2.1 Orientation Markers of the Probe and Image Display	4
2.2 Scan Plane Directions	6
2.3 The Relationship Between the Sagittal and Transverse Scan Planes	7
2.3.1 To Change the Scan Plane from Sagittal to Transverse	7
2.3.2 To Change the Scan Plane from Transverse to Sagittal	8
2.4 Oblique Scan Planes	9
2.4.1 Sag and Trans Scan Planes for the Midline Uterus	9
2.4.2 Sag and Trans Scan Planes for Right Tilted Uterus	9
2.4.3 Trans and Sag Scan Planes for Left Tilted Uterus	10
2.5 Annotation or Labelling Images	11
2.6 Transducer Manipulation Techniques	11
2.7 Basics of Interrogation of Structures by Sweeping the Sound Beam	18
2.7.1 Sagittal Sweep Directions	20
2.7.2 Transverse Sweep Directions	20
2.8 Interrogation of Organs and Structures That Lie in Oblique Planes	21
2.8.1 Example 1: Sag Sweeps for Right Tilted Uterus	21
2.8.2 Example 2: Trans Sweeps for Left Tilted Uterus	22
2.9 Key Points to Remember When Scanning	22
2.10 Transabdominal Ultrasound Scanning of Female Pelvis	23
2.10.1 Clinical History for Gynecological Ultrasound	23

2.10.2	Transabdominal Ultrasound Scanning Protocol for Female Pelvis	23
2.11	Tips for Dealing with Overlying Bowel Gas	41
	Bibliography	41
3	Transvaginal Ultrasound Scanning of Female Pelvis	42
3.1	Orientation Markers for TV Probe and Image Display	42
3.2	Scan Plane Directions for TV Ultrasound Scanning	43
3.3	Transducer Manipulation Techniques for TV Scanning	46
3.4	TV Scanning in the Anterior Fornix Versus the Posterior Fornix	53
3.4.1	To Reposition Probe Head from Posterior Fornix to Anterior Fornix	54
3.4.2	To Reposition Probe Head from Anterior Fornix to Posterior Fornix	55
3.5	How to Recognize Variations in Uterine Position	55
3.6	Preparation for TV Ultrasound Scanning	58
3.6.1	Prior to the Start of the TV Examination	58
3.6.2	At the Start of the TV Examination	59
3.6.3	During the TV Examination	59
3.6.4	At the End of the TV Examination	59
3.7	TV Scanning of the AV Uterus	59
3.8	TV Scanning of the RV Uterus	69
3.9	TV Scanning of the Ovaries and Adnexa	77
	Bibliography	81
4	Obstetrical Ultrasound Scanning	82
4.1	Introduction to Obstetrical Ultrasound Scanning	82
4.2	Clinical History in Pregnancy	83
4.3	Gestational Age in Pregnancy and Determining the Estimated Due Date	83
4.4	Survey of the Maternal Pelvis and Gravid Uterus	83
4.5	Fetal Position	85
4.6	Fetal Lie	86
4.6.1	Method for Determining the Fetal Lie	87
4.7	Fetal Presentation	87
4.8	Determining Fetal Right and Left Sides	88
4.8.1	Method to Determine Fetal Right and Left Sides	88
4.8.1.1	Example 1: Determining Situs for Breech Fetus	89
4.8.1.2	Example 2: Determining Situs for Cephalic Fetus	89
4.8.1.3	Example 3: Determining Situs for Fetus in Oblique Lie	90
4.9	Understanding the Scan Plane Directions Relative to the Fetus	91
4.10	Fetal Sweep Directions	92
4.11	Key Points to Remember During Obstetrical Scanning	93
4.12	The Ultrasound Scan in the First Trimester	94
4.12.1	Nuchal Translucency	94
4.12.2	Example Protocol for Ultrasound Scan in the First Trimester	95
4.13	Placenta	102
4.13.1	Method for Determining Low-Lying Placenta and Placenta Praevia	103
4.14	Ultrasound Assessment of the Cervix in Pregnancy	104
4.15	Uterine Contraction in Pregnancy	105
4.16	The Ultrasound Scan in the Second Trimester	106

4.16.1	Amniotic Fluid	106
4.16.2	Fetal Biometry Measurements	107
4.16.3	Challenge of Scanning the Mobile Fetus	107
4.16.4	Fetal Activity	107
4.16.5	Example Protocol for Ultrasound Scan in the Second Trimester	107
4.17	The Ultrasound Scan in the Third Trimester	134
4.17.1	Biophysical Profile	134
4.17.2	Example Protocol for Ultrasound Scan in the Third Trimester	135
	Bibliography	136
	Appendix A	138
	Index	139
