Derivation of the Wave Kinetic Equation: Full Range of Scaling Laws

Yu Deng
Zaher Hani

April 2026 • Volume 320 • Number 1631 (fifth of 7 numbers)

Contents

Chapter 1. Introduction	1
1.1. Setup and the main result	1
1.2. Background and literature	3
1.3. The scaling laws	4
1.4. Ingredients of the proof	7
1.5. Future Horizons	9
Chapter 2. Preparations	11
2.1. Preliminary reductions	11
2.2. Parameters, notations and norms	12
2.3. Trees, couples and decorations	13
2.4. The ansatz and main estimates	14
Chapter 3. Overview of the proof	17
3.1. Previous strategy, and the main difficulty	17
3.2. Vines, derived from cutting	19
3.3. The miraculous cancellation	23
3.4. Construction of a parametrix	26
3.5. Plan of this paper	26
Chapter 4. Couples and molecules	29
4.1. Definition of molecules	29
4.2. Regular couples and regular trees	31
4.3. Blocks	33
Chapter 5. Vines and twists	39
5.1. Vines	39
5.2. Twists	42
5.3. Full twists	45
Chapter 6. $\mathcal{K}_Q$ estimates for regular couples and regular trees	47
6.1. Asymptotics and cancellations for $\mathcal{K}_Q$	47
6.2. Proof of Propositions 6.1 and 6.3	48
6.3. Reduction to prime couples	62
Chapter 7. $\mathcal{K}_Q$ estimates for vines	65
7.1. Two general estimates for sum-integrals	65
7.2. Application to vines	70
Chapter 8. Reduction to counting estimates	85
8.1. Preliminary setup	85

8.2. Stage 1 reduction: Small gap (CL) vines	87
Chapter 9. Reduction to large gap molecules	95
9.1. Preliminary setup	95
9.2. The cutting operation	97
9.3. Stage 2 reduction: Cutting degree 3 and 4 atoms	98
9.4. The molecule M_{fin}	100
Chapter 10. Counting problem for large gap molecules	103
10.1. Preliminary setup	103
10.2. Proof of Proposition 10.2	108
10.3. Proof of Proposition 10.3	110
10.4. Proof of Proposition 10.4	112
10.5. Addressing degenerate cases	116
Chapter 11. Linearization and the end of the proof	119
11.1. Proof of Proposition 2.6	119
11.2. Proof of Theorem 1.1	122
Appendix A. Auxiliary results	123
A.1. Counting estimates	123
A.2. Miscellaneous	127
Appendix B. The algorithm for large gap molecules	131
B.1. The setup	131
B.2. The operations	131
B.3. The algorithm	138
Acknowledgments	140
Bibliography	141
