Preface	v
K. Alladi, P. Paule, J. Sellers, and A.J. Yee	
Cranks—really, the final problem	1
B.C. Berndt, H.H. Chan, S.H. Chan, and W.-C. Liaw	
Eisenstein series and Ramanujan-type series for $1/\pi$	15
N.D. Baruah and B.C. Berndt	
Parity in partition identities	43
G.E. Andrews	
Some combinatorial properties of hook lengths, contents, and parts of partitions	89
R.P. Stanley	
The doubloon polynomial triangle	105
D. Foata and G.-N. Han	
Hook lengths and shifted parts of partitions	125
G.-N. Han	
A unification of two refinements of Euler’s partition theorem	135
W.Y.C. Chen, H.Y. Gao, K.Q. Ji, and M.Y.X. Li	
Identities and congruences for Ramanujan’s $\omega(q)$	149
J.H. Bruinier and K. Ono	
On the subpartitions of the ordinary partitions	157
B. Kim	
Arithmetic properties of partitions with even parts distinct	167
G.E. Andrews, M.D. Hirschhorn, and J.A. Sellers	
Modularity and the distinct rank function	181
A. Folsom	
Cluster parity indices of partitions	193
K. Kurşungöz	
Ramanujan’s partial theta series and parity in partitions	213
A.J. Yee	
A combinatorial study and comparison of partial theta identities of Andrews and Ramanujan	225
K. Alladi	

New identities involving sums of the tails related to real quadratic fields	241
K. Bringmann and B. Kane	
Rademacher-type formulas for restricted partition and overpartition functions	251
A.V. Sills	
Bijjective proofs using two-line matrix representations for partitions	263
E.H.M. Brietzke, J.P.O. Santos, and R. da Silva	
Balanced partitions	295
S. Vandervelde	
Partitions with rounded occurrences and attached parts	305
J. Lovejoy	
Shifted versions of the Bailey and Well-Poised Bailey lemmas	313
F. Jouhet	
Column-to-row operations on partitions: Garden of Eden partitions	333
B. Hopkins and L. Kolitsch	
Some Fine combinatorics	339
D.P. Little	
Symmetrically constrained compositions	353
M. Beck, I.M. Gessel, S. Lee, and C.D. Savage	
Bentley's conjecture on popularity toplist turnover under random copying	369
K. Eriksson, F. Jansson, and J. Sjöstrand	
Log-convexity properties of Schur functions and generalized hypergeometric functions of matrix argument	395
D.St.P. Richards	
Infinite families of strange partition congruences for broken 2-diamonds	407
P. Paule and S. Radu	
On the Andrews–Schur proof of the Rogers–Ramanujan identities	415
H.-C. Chan	
Congruences modulo powers of 2 for a certain partition function	431
H.-C. Chan and S. Cooper	
New multiple ${}_6\psi_6$ summation formulas and related conjectures	449
V.P. Spiridonov and S.O. Warnaar
