

CONTENTS

Editorial Note	vii
Jörg Siekmann and Dov Gabbay	
List of Authors and Readers	viii
Part I. Introduction	
Computational Logic	15
Jörg Siekmann	
Logic and the Development of the Computer	31
Martin Davis	
Part II. General	
What is a Logical System? An Evolutionary View: 1964–2014	41
Dov Gabbay	
Part III. Automated Reasoning	
Interactive Theorem Proving	135
John Harrison, Josef Urban and Freek Wiedijk	
Automation of Higher Order Logic	215
Christoph Benz Müller and Dale Miller	
Equational Logics and Rewriting	255
Claude Kirchner and Hélène Kirchner	
Possibilistic Logic — An Overview	283
Didier Dubois and Henri Prade	
Computerizing Mathematical Text	343
Fairouz Kamareddine, Joe Wells, Christoph Zengler and Henk Barendregt	

Part IV. Computer Science

Concurrency Theory: a Historical Perspective on Coinduction and Process Calculi Jos Baeten and Davide Sangiori	399
Degrees of Unsolvability Klaus Ambos-Spies and Peter A. Fejer	443
Computational Complexity Lance Fortnow and Steven Homer	495
Logic Programming Bob Kowalski	523
Logic and Databases: A History of Deductive databases Jack Minker, Dietmar Seipel and Carlo Zaniolo	571
Logics for Intelligent Agents and Multi Agent Systems John-Jules Ch. Meyer	629
Description Logics Matthias Knorr and Pascal Hitzler	659
Logics for the Semantic Web Pascal Hitzler, Jens Lehmann and Axel Polleres	679
Index	711
