# Contents

Preface xi

Acknowledgments xvii

## 1 The Puzzle of Seeing 1

1.1 Why Do Things Look the Way They Do? 1

1.2 What Is Seeing? 2

1.3 Does Vision Create a “Picture” in the Head? 4

1.4 Problems with the Inner-Display Assumption: Part 1, What’s in the Display? 16

1.5 More Problems with the Inner-Display Assumption: Part 2, Seeing or Figuring Out? 36

1.6 Where Do We Go from Here? 46

## 2 The Independence of Vision and Cognition 49

2.1 Is Vision Distinct from Reasoning? 49

2.2 The Case for the Continuity of Vision and Cognition 52

2.3 Some Reasons for Questioning the Continuity Thesis 64

2.4 Distinguishing Perceptual and Decision Stages: Some Methodological Issues 73

2.5 Some Examples in Which Knowledge Is Claimed to Affect Perception 76

2.6 Conclusions: Early Vision as a Cognitively Impenetrable System 90

## 3 The Architecture of the Early-Vision System: Components and Functions 93

3.1 Some Intrinsic Architectural Factors Determining What We See 93

3.2	What Is Computed by the Encapsulated Early-Vision System?	122
3.3	Some Subprocesses of the Visual System	142
3.4	Visual Control of Action: An Encapsulated System?	150
3.5	Interactions among Modular Systems	156
<b>4</b>	<b>Focal Attention: How Cognition Influences Vision</b>	<b>159</b>
4.1	Focal Attention in Visual Perception	160
4.2	Focal Attention as Selective Filtering	161
4.3	Allocation of Visual Attention	166
4.4	Individuation: A Precursor to Attentional Allocation?	173
4.5	Visual Attention Is Directed at <i>Objects</i>	181
4.6	Neuropsychological Evidence for Object-Based Information Access	194
4.7	What Is Selected in Visual Attention?	199
<b>5</b>	<b>The Link between Vision and the World: Visual Indexes</b>	<b>201</b>
5.1	Background: The Need to Keep Track of Individual Distal Objects	202
5.2	Visual-Index (or FINST) Theory	209
5.3	Empirical Support for the Visual-Index Theory	223
5.4	Why Do We Need a Special Connection between Vision and the World?	242
5.5	Indexes and the Development of the Object Concept in Infants	259
5.6	Possible Implementations of the FINST Indexing Mechanism	268
	Appendix 5.A: Sketch of a Partial Network-Implementation of the FINST Indexing Mechanism	275
<b>6</b>	<b>Seeing with the Mind's Eye: Part 1, The Puzzle of Mental Imagery</b>	<b>281</b>
6.1	What Is the Puzzle about Mental Imagery?	281
6.2	Content, Form, and Substance of Representations	290
6.3	What Is Responsible for the Pattern of Results Obtained in Imagery Studies?	293
6.4	Some Alleged Properties of Images	328
6.5	Mental Imagery and Visual Perception	333

<b>7 Seeing with the Mind's Eye: Part 2, The Search for a Spatial Display in the Brain</b>	<b>359</b>
7.1 Real and "Functional" Space	359
7.2 Why Do We Think That Images Are Spatial?	368
7.3 Inheritance of Spatial Properties of Images from Perceived Space	375
7.4 The Search for a Real Spatial Display	387
7.5 What Would It Mean If All the Neurophysiological Claims Turned Out to Be True?	400
7.6 What, If Anything, Is Special about Mental Imagery?	419
<b>8 Seeing with the Mind's Eye: Part 3, Visual Thinking</b>	<b>427</b>
8.1 Different "Styles" of Thinking	427
8.2 Form and Content of Thoughts: What We Think with and What We Think about	428
8.3 How Can Visual Displays Help Us to Reason?	439
8.4 Thinking with Mental Diagrams	458
8.5 Imagery and Imagination	464
References	475
Name Index	517
Subject Index	527
