

Contents

Introduction	vii
Part 1	<i>ANCILLARY MODERN MATHEMATICS</i>
Preface	3
Chapter 1 Set theory	5
Chapter 2 The Sigma operator	28
Chapter 3 Matrices	41
Chapter 4 Inequalities	68
Chapter 5 Graph theory	85
Appendix: Partial differentiation	105
Part 2	<i>PROBABILITY AND STATISTICS</i>
Chapter 1 Probability theory	115
Chapter 2 Introduction to Statistics: frequency distributions	145
Chapter 3 Descriptive statistics	159
Chapter 4 Probability distributions	178
Chapter 5 Sampling	213
Chapter 6 Sampling distributions	223
Chapter 7 Statistical inference	235
Chapter 8 Bivariate experiments	270
Miscellaneous problems	298
Appendix I Statistical tables	309
Appendix II Generating functions	316
Appendix III The Central Limit Theorem	320
Appendix IV 'Student's' t -distribution	323
Part 3	<i>APPLIED PROBABILITY AND OPERATIONAL RESEARCH</i>
Preface	329
Chapter 1 Markov chains	333
Chapter 2 Some queue models	362
Chapter 3 Linear programming	386
Chapter 4 Network planning	418
Chapter 5 Inventory control	437
Bibliography	453
Answers	455
Index	497
