

CRITICAL STATISTICS: SEEING BEYOND THE HEADLINES

Robert de Vries

CONTENTS

List of Figures and Tables	ix
Abbreviations	xi
Preface	xii
Tour of the Book	xiv
Guide to the Website	xv
Acknowledgements	xvii
1. 99% of statistics are made up	1
The world runs on numbers	6
Statistics in the fake news era	9
Don't be part of the problem	12
2. Where do numbers come from?	17
Making the news	20
#nofilter	23
Where's the harm?	27
A lie can run around the world before the truth can get its boots on	32
3. Samples, samples everywhere ...	38
It's samples all the way down ...	39
Size matters	44
Bad samples	54
Spotting biased samples	57
The magic of sampling	62
4. Measure for measure	68
The dark side of immigration in open, generous Sweden	68
Define your terms	71
How to lie with definitions	74
Counting is hard	77
Asking the right questions	80
There's no such thing as a perfect statistic	86

5. What does it mean to be average?	91
Average man	91
The mean doesn't always mean what you think it means	94
Why doesn't everyone know this already?	97
The median: The mean's under-appreciated brother	99
Averages are not real	105
6. Fraction of a man	111
There are two kinds of data in the world	111
What's the point of percentages?	113
Percentages – backwards and forwards	118
Risky business	120
Statistics aren't real	124
7. Cause and effect	131
Kill or cure	133
CSI: Causation	135
The drugs don't work	139
'Have smartphones destroyed a generation?'	143
Establishing causation is not impossible	148
The rush to infer causation	150
8. Bad graphics	156
Electioneering	156
Charts as a collection of 'visual metaphors'	158
Bad charts: A spotter's guide	161
Nonsense graphs	182
9. Context is everything	192
'Is that a big number?'	194
Four questions	194
Camera tricks	206
10. Do it yourself	210
The gender pay gap	211
Writing up the results	224
How to use statistics to tell the truth	230
Notes	237
Index	246
