

## CONTENTS

<i>Preface</i>		xiii
<i>Acknowledgments</i>		xv
<b>Chapter 1</b>	<b>Symmetry Operations</b>	
1-1	Introduction	1
1-2	Point Symmetry Operations	2
1-3	The Stereographic Projection	8
1-4	The 32 Crystallographic Point Groups	10
1-5	Related Considerations	13
1-6	Space Group Example	16
	Notes	18
	Problems	19
<b>Chapter 2</b>	<b>Group Concepts</b>	
2-1	Introduction	21
2-2	Definition of a Group	21
2-3	Symmetry Operations Form a Group	25
2-4	Related Group Concepts	25
2-5	Isomorphism and Homomorphism	27
2-6	Special Kinds of Groups	28
2-7	More Involved Group Concepts (including a Factor Group of a Space Group)	30
	Appendix to Chapter 2	32
	Notes	35
	Problems	35

<b>Chapter 3</b>	<b>Matrix Representations of Finite Groups</b>	
3-1	Introduction	37
3-2	Representations	38
3-3	Irreducible Representations	41
3-4	Representations of a Factor Group	45
	Appendix to Chapter 3	46
	Notes	47
	Problems	48
<b>Chapter 4</b>	<b>Characters of Matrix Representations of Finite Groups</b>	
4-1	Properties of Characters of Irreducible Representations	50
4-2	Character Tables	57
4-3	Reduction of a Reducible Representation	59
4-4	Basis Functions	60
4-5	Examples—Neumann Principle	63
4-6	Atomic Positions	70
4-7	The Hamiltonian	72
	Appendix to Chapter 4	74
	Notes	75
	Problems	75
<b>Chapter 5</b>	<b>Vibrations of Molecules and Crystals</b>	
5-1	3N Degrees of Freedom	79
5-2	General Considerations	80
5-3	Number and Type of Normal Modes for Molecules	84
5-4	Internal Coordinates	89
5-5	Crystals	90
5-6	Eigenvectors and Symmetry Adapted Vectors	94
5-7	Projection Operators	96
5-8	Projection Operators Applied to Normal Coordinates	98
	Notes	102
	Problems	103
<b>Chapter 6</b>	<b>Normal Modes (Direct Product and Selection Rules)</b>	
6-1	Direct Product of Irreducible Representations	105
6-2	Vibrational Wave Function	110

6-3	Selection Rules—Infrared and Raman	112
6-4	Molecular Approximations (Site Symmetry and Davydov Splitting)	120
	Notes	122
	Problems	123
<b>Chapter 7</b>	<b>Quantum Mechanics</b>	
7-1	Atomic Wave Functions	125
7-2	Transformation of Functions	127
7-3	Eigenfunctions as Basis Functions	131
7-4	Proper Rotations and Angular Momentum	135
7-5	Perturbations	137
7-6	Matrix Elements (Selection Rules)	141
7-7	General Secular Equation Problem	148
	Appendix to Chapter 7	151
	Notes	153
	Problems	154
<b>Chapter 8</b>	<b>Crystal Field Theory (and Atomic Physics)</b>	
8-1	Rotations in Terms of Euler Angles	157
8-2	Representations of the Full Rotation Group	159
8-3	Reduction of Symmetry	162
8-4	Energy Level Diagrams (Correlation Diagrams)	167
8-5	Crystal Double Groups	179
8-6	Correlation Diagrams including Double Groups	184
8-7	Other Crystal Field Effects	187
	Appendix to Chapter 8	190
	Notes	196
	Problems	197
<b>Chapter 9</b>	<b>Hybrid Functions</b>	
9-1	Introduction	199
9-2	Simple Hybrid Functions and Bonding	201
9-3	Tetrahedral Hybridization	202
9-4	Other Hybrid Functions	206
9-5	$\pi$ -Hybrid Functions	208
9-6	Comment on Hybrid Orbitals (Slater Determinant)	213
	Notes	214
	Problems	215

<b>Chapter 10</b>	<b>Molecular Orbital Theory</b>	
10-1	Hydrogen Molecular Ion	216
10-2	Simple MO Theory	219
10-3	Transition Metal Complexes	220
10-4	LCAO-MO of $\pi$ -Electrons in Conjugated Hydrocarbons	232
10-5	Woodward-Hoffman Rules	239
	Notes	246
	Problems	247
<b>Chapter 11</b>	<b>Symmetry of Crystal Lattices</b>	
11-1	The Real Affine Group	250
11-2	Space Group	251
11-3	Translational Lattice	254
11-4	International Tables for X-Ray Crystallography, International Notation, etc.	264
11-5	Magnetic Groups (Color Groups)	274
	Notes	280
	Problems	281
<b>Chapter 12</b>	<b>Band Theory of Solids</b>	
12-1	Translational Symmetry	284
12-2	Symmorphic Space Groups	300
12-3	Nonsymmorphic Space Groups	321
12-4	Spin-Orbit Effects on Bands	326
12-5	Time Reversal Symmetry	332
	Notes	339
	Problems	339
<b>Chapter 13</b>	<b>The Full Rotation Group</b>	
13-1	The Homomorphism between the Special Unitary Group in Two Dimensions, SU(2), and the Three-Dimension Rotation Group	341
13-2	Irreducible Representations of SU(2)	345
13-3	Wigner Coefficients	347
13-4	Irreducible Tensor Operators	351
13-5	The Wigner-Eckart Theorem	355
13-6	Survey of 3j and Racah Coefficients	364
	Notes	366
	Problems	367

Appendix 1	<b>Crystal Systems</b>	371
Appendix 2	<b>The 32 Point Groups</b>	377
Appendix 3	<b>Character Tables</b>	379
Appendix 4	<b>Space Groups</b>	391
Appendix 5	<b>Matrices, Vector Spaces, and Linear Operators</b>	396
Appendix 6	<b>Direct Product Tables</b>	403
Appendix 7	<b>Correlation Tables</b>	405
Appendix 8	<b>Spherical Harmonics</b>	409
Appendix 9	<b>Tanabe–Sugano Diagrams</b>	413
Appendix 10	<b>Double Group Character Tables</b>	417
	<b>Bibliography</b>	420
	<i>Index</i>	425
